LIST OF TABLES

I.	INTRODUCTION	1
	I. 1. Background	1
	I. 2. Indonesian Tectonic Setting	2
	I. 3. Indonesian Earthquake Source Zones	3
II.	STUDY AREA	6
	II. 1. Geographical Setting	6
	II. 2. Geology Feature	6
III.	LITERATURE REVIEW	10
	III. 1. General	10
	III. 2. Earthquake Measurement	10
	III.2. 1. Earthquake Intensity Scale	10
	III.2. 2. Earthquake Magnitude	13
	III.2. 3. Earthquake Energy	14
	III. 3. Earthquake Sources Identification	15
	III. 4. Seismic Hazard Analysis	17
	VII.4.1. Deterministic Seismic Hazard Assessment	18
	VII.4.2. Probabilistic Seismic Hazard Assessment	19
	VII.4.3. Attenuation Function	22
	III. 5. Logic Tree Approach	26
	III. 6. Earthquake Acceleration at Base Rock	27
	III. 7. De-aggregation	27
IV.	RESEARCH DESIGN	28
	IV. 1. Research Problem	28
	IV. 2. Research Objective	28
	IV. 3. Research Question	29
	IV. 4. Research Hypothesis	29
	IV. 5. Research Scope	30
	IV. 6. Expected Outcome	31
	IV. 7. Earthquake Data Collection and Code	32
	VI.7.1. Basic Data	32
	VI.7.2. Hazard data	32
	VI.7.3. Computer Code	32
V.	TECTONIC SETTING AND CHARACTERISTIC OF YOGYAKARTA PROVINCE	33
	V. 1. Yogyakarta's Earthquake Sources and Its around Area	33
	V. 2. Historical Earthquake of Yogyakarta	34
	V. 3. Earthquake Recorded	38

VI. METHODOLOGY	40
VI. 1. Earthquake Catalogue	40
VI. 1.1. Magnitude scale conversion	40
VI. 1.2. Analyzing the dependency of earthquake events	41
VI. 1.3. Analyzing the completeness of earthquake catalogue	43
VI. 1.4. Empirical relationship between MMI and PGA	44
VI. 2. Earthquake Source Model	45
VI. 3. Earthquake Recurrence Rate	48
VI.3.1. Least Square Model	48
VI.3.2. Weichert Model	49
VI.3.3. Kijko and Sellevoll Model	49
VI. 4. Maximum Magnitude	52
VI. 5. Attenuation Function	54
VI. 6. Probabilistic Seismic Hazard Assessment	54
VII. ANALYSIS RESULT	57
VII.1 General	57
VII.2 Deterministic Analysis	57
VII.3 Probabilistic Analysis	67
VII.3.1. Weight of Logic Tree	67
VII.3.1.1. Weight of Logic Tree for Attenuation Function of Sub-duction Zones	68
VII.3.1.2. Weight of Logic Tree for Attenuation Function of Shallow Crustal Zones	68
VII.3.1.3. Weight of Logic Tree for Fault/Dip Inclination	69
VII.3.1.4. Weight of Logic Tree for Earthquake Parameters	69
VII.3.1.5. Weight of Logic Tree for maximum magnitude	69
VII.3.2. Earthquake Hazard Analysis Result for Yogyakarta Province	69
VIII. CONCLUSION AND SUGGESTION	73
VIII.1. Conclusion	73
VIII.2. Suggestion	74
