

Table of Contents

Title Page	i
Approval Page	ii
Declaration of Originality	iii
Preface	v
Table of Contents	vi
List of Tables	viii
List of Figures	ix
List of Appendices	x
List of Terms	xi
Abstract	xii
Intisari	xiii
CHAPTER I. INTRODUCTION	1
1.1 Background	1
1.2 Problem Statement	4
1.3 Research Questions	7
1.4 Research Objectives	7
1.5 Research Motivation	8
1.6 Research Benefits	8
1.7 Research Contribution	8
1.8 Scope and Limitation	9
1.9 Thesis Organization	9
CHAPTER II. THEORETICAL FRAMEWORK AND LITERATURE REVIEW	11
2.1 Theoretical Framework	11
2.2 Literature Reviews	13
2.3 Social Transfer Programs in Indonesia	19
CHAPTER III. RESEARCH METHOD	22
3.1 Research Design	22
3.2 Operational Definition of Variables	25

3.3 Data Analysis Techniques	30
CHAPTER IV. RESULTS AND DISCUSSION	33
4.1 Overview of Research Variables	33
4.2 The Relationship between Social Transfer Programs and Child Labor	38
4.3 Robustness check	43
4.4 Discussion	57
CHAPTER V. CONCLUSIONS	62
5.1 Conclusions	62
5.2 Limitations	63
5.2 Policy Implication	63
References	64
Appendix	69

List of Tables

Table 3.1 Operational Definition of Variables	25
Table 4.1 Summary Statistics	33
Table 4.2 Yearly Trends of Children Aged 10–17, 2018–2024	35
Table 4.3 Number of Children by Gender and Urban-Rural Area	37
Table 4.4 Marginal Effects from Recursive Bivariate Probit Estimation: PKH as an Endogenous Variable	39
Table 4.4 Marginal Effects from Recursive Bivariate Probit Estimation: BPNT as an Endogenous Variable	44
Table 4.4 Marginal Effects from Recursive Bivariate Probit Estimation: PIP as an Endogenous Variable	48

List of Figures

1.1 Percentage of Children Aged 10-17 Engaged in Work, Indonesia.....	4
1.2 Children Aged 10-17 Years Engaged in Work by Province, 2023	5

List of Appendices

1. Average Values of Selected Variables by Social Transfer Program Participation	68
2. Estimation Results Recursive Bivariate Probit Model: PKH Before Covid-19	69
3. Estimation Results Recursive Bivariate Probit Model: BPNT Before Covid-19	70
4. Estimation Results Recursive Bivariate Probit Model: PIP Before Covid-19	71
5. Estimation Results Recursive Bivariate Probit Model: PKH During Covid-19	72
6. Estimation Results Recursive Bivariate Probit Model: BPNT During Covid-19	73
7. Estimation Results Recursive Bivariate Probit Model: PIP During Covid-19	74
8. Estimation Results Recursive Bivariate Probit Model: PKH After Covid-19	75
9. Estimation Results Recursive Bivariate Probit Model: BPNT After Covid-19	76
10. Estimation Results Recursive Bivariate Probit Model: PIP After Covid-19	77
11. Average Treatment Effects (ATE) Estimated from the Recursive Bivariate Probit (RBP) Model	78
12. Robustness of Estimates for Child Outcomes Across Different Model ...	79
13. VIF	82
