LIST OF TABLES	xvii
LIST OF APPENDICES	xix
LIST OF PUBLICATION	xxi
ABSTRACT	xxii
INTISARI	xxiv
CHAPTER I INTRODUCTION	1
I.1 General Research Background.....	1
I.2 General Research Problem.....	5
I.3 Research Novelty	5
I.3.1 Research novelty in synthesis.....	5
I.3.2 Research novelty in pharmacology	7
I.3.3 Research novelty in material studies	7
I.4 Research Objectives.....	7
I.5 Research Benefits	8
I.6 Dissertation Structure	8
CHAPTER II PRELIMINARY LITERATURE REVIEW	11
II.1. Graphene And Its Derivatives.....	11
II.2 Graphene Oxide Surface Modification	16
II.3 Graphene-Based Materials Application.....	20
CHAPTER III MICROWAVE-ASSISTED SYNTHESIS OF ULTRASMALL GOLD NANOPARTICLES DECORATED ON GO AND RGO	23
III.1 Introduction	23
III.1.1 Research background.....	23
III.1.2 Research problems	25
III.1.3 Research purposes.....	25
III.2 Literature Review	25
III.2.1 Graphene-based composite	25
III.2.2 Gold Nanoparticles	29
III.2.3 Microwave synthesis in inorganic materials.....	32
III.3 Hypothesis Formulation and Experimental Design	37
III.3.1 Hypothesis I	37
III.3.2 Hypothesis II.....	37
III.3.3 Hypothesis III	38
III.3.4 Experimental design	39

III.4	Experimental Method.....	39
III.4.1	Materials	39
III.4.2	Equipment.....	39
III.4.3	Instruments.....	40
III.4.4	Graphene oxide synthesis	40
III.4.5	GO-Au and rGO-Au synthesis.....	41
III.4.6	Materials characterization.....	42
III.5	Result and Discussion	42
III.5.1	Graphene oxide synthesis.....	42
III.5.2	Effect of microwave irradiation on rGO-Au reduction degree	44
III.5.3	Effect of microwave irradiation on elemental composition of rGO-Au.....	50
III.5.4	Effect of microwave irradiation on rGO-Au morphology and AuNPs size	51
III.5.5	GO-Au synthesis and comparison with rGO-Au ...	56
III.6	Conclusion	66
CHAPTER IV CYTOTOXICITY, ANTIOXIDANT AND ANTIBACTERIAL ASSAY OF GO-Au AND rGO-Au NANOCOMPOSITES		67
IV.1	Introduction.....	67
IV.1.1	Research background.....	67
IV.1.2	Research problems.....	69
IV.1.3	Research objectives	69
IV.2	Literature Review.....	69
IV.2.1	Graphene-based materials in biomedical application	69
IV.2.2	Antibacterial activity of graphene-based materials	72
IV.2.3	Antioxidant activity of graphene-based materials..	76
IV.2.4	Cytotoxicity of graphene-based materials	80
IV.3	Hypothesis Formulation.....	85
IV.3.1	Hypothesis I.....	85
IV.3.2	Hypothesis II.....	85
IV.3.3	Experimental design	86
IV.4	Experimental Method.....	87
IV.4.1	Materials	87
IV.4.2	Equipment.....	87
IV.4.3	Instruments	88
IV.4.4	Antibacterial assay of rGO-Au and GO-Au	88
IV.4.5	Antioxidant assay of rGO-Au and GO-Au	90
IV.4.6	Cytotoxicity assay.....	91
IV.5	Result and Discussion	91
IV.5.1	Antibacterial assay of rGO-Au	91
IV.5.2	Comparison of GO-Au and rGO-Au antibacterial activity	99
IV.5.3	Antioxidant assay.....	103

	IV.5.4 Cytotoxicity assay.....	107
	IV.6 Conclusion	113
CHAPTER V	ANTIVIRAL ASSAY OF GO/rGO-Au AND GO/rGO-Zn AGAINST DENGUE VIRUS	115
	V.1 Introduction	115
	V.1.1 Research background.....	115
	V.1.2 Research problems	117
	V.1.3 Research objectives.....	118
	V.2 Literature Review	118
	V.2.1 Graphene-based materials as antiviral	118
	V.2.2 Gold nanoparticles antiviral potential.....	122
	V.2.3 Antiviral activity of zinc oxide	125
	V.2.4 Dengue virus	128
	V.3 Hypothesis Formulation	131
	V.3.1 Hypothesis I	131
	V.3.2 Hypothesis II.....	132
	V.3.3 Hypothesis III.....	133
	V.3.4 Experimental design.....	134
	V.4 Experimental Method.....	135
	V.4.1 Materials	135
	V.4.2 Equipments	136
	V.4.3 Instruments.....	136
	V.4.4 Graphene-based materials synthesis	136
	V.4.5 Cytotoxicity assay	138
	V.4.6 Antiviral Assay	138
	V.4.7 Electron microscopy of DENV.....	142
	V.5 Result and Discussion	143
	V.5.1 Synthesis and characterization of GO.....	143
	V.5.2 Synthesis of GO–Au and rGO–Au and their characterization	147
	V.5.3 Synthesis of GO–Zn and rGO–Zn and their characterization	159
	V.5.4 Cytotoxicity Assay.....	173
	V.5.5 Antiviral assay optimization	178
	V.5.6 Antiviral assay of various synthesized graphene materials	182
	V.5.7 Antiviral assessment of GO-Au and GO-Zn at various concentrations.....	184
	V.5.8 Antiviral assessment of GO-Au and GO-Zn with different treatment approaches.....	186
	V.5.9 Microscopy observation and analysis for antiviral assays	188
	V.5.10 Potential antiviral mechanism of GO-Au and GO-Zn	193
	V.6 Conclusion.....	197

CHAPTER VI ANTIVIRAL ASSAY GRAPHENE OXIDE - NICLOSAMIDE.....	199
VI.1 Introduction.....	199
VI.1.1 Research background.....	199
VI.1.2 Research problems.....	202
VI.1.3 Research objectives	202
VI.2 Literature Review.....	203
VI.2.1 Niclosamide broad-spectrum antiviral activity.....	203
VI.2.2 Graphene functionalization with organic compounds and nanocarrier ability.....	206
VI.3 Hypothesis Formulation.....	208
VI.3.1 Hypothesis I.....	208
VI.3.2 Hypothesis II and III.....	209
VI.3.3 Experimental Design	210
VI.4 Experimental Method.....	211
VI.4.1 Materials	211
VI.4.2 Equipments	212
VI.4.3 Instruments	212
VI.4.4 Synthesis GO-Nic	213
VI.4.5 Measurement of Niclosamide Content in GO-Nic	213
VI.4.6 Cytotoxicity assay.....	214
VI.4.7 Antiviral Assay	214
VI.4.8 Electron microscopy of DENV.....	214
VI.4.9 Data analysis and processing.....	214
VI.5 Result and Discussion.....	215
VI.5.1 Synthesis GO-Nic	215
VI.5.2 Effect of Niclosamide Concentration on GO-Nic.....	217
VI.5.3 GO-Nic characterization	219
VI.5.4 Cytotoxicity Assay of GO-Nic.....	229
VI.5.5 Antiviral Evaluation of GO-Nic.....	232
VI.5.6 Microscopy observation and analysis for antiviral assays	235
VI.5.7 Proposed antiviral mechanism	238
VI.6 Conclusion	241
CHAPTER VII CONCLUSION AND RECOMMENDATION.....	243
VII.1 Conclusion	243
VII.2 Recommendation	244
REFERENCES.....	246
APPENDICES	273
