STATEMENT	iii
ACKNOWLEDGEMENT	iv
CONTENT	v
LIST OF FIGURES	vii
LIST OF TABLES	viii
ABSTRACT	ix
INTISARI	x
CHAPTER I INTRODUCTION.....	1
A. Background	1
B. Study Aims	3
CHAPTER II LITERATURE REVIEW	4
A. Reaction Tissues	4
1. Reaction Tissues and Reaction Wood	4
2. Anatomical Characteristics of Tension Wood	5
3. Gelatinous Fiber Variation	6
4. Tension Wood and Wood Quality	7
B. Torsional Forces	8
C. <i>Swietenia macrophylla</i>	9
D. Hypothesis	10
CHAPTER III MATERIALS & METHODS.....	11
A. Plant Materials.....	11
B. Treatment of Seedlings	11
C. Sample collection and fixation	13
D. Make a Section and Staining	13
E. Maceration	14
F. Starch content.....	14
G. Analysis of Anatomical Characteristics.....	14
H. Parameters	15

I. Statistical Analysis	15
CHAPTER IV RESULTS	16
A. Results	16
B. Presence of Reaction Wood Tissues	17
1. Radial Width of G-layer-like	17
2. Thickness of G-layer-like	19
C. Fiber properties	20
1. Fiber Length	20
2. Fiber Wall Thickness	21
D. Vessel Properties	22
1. Vessel Frequency	22
2. Vessel Size	22
E. Starch Content	23
F. Other Anatomical Effects	24
1. Resin Canal	25
CHAPTER V DISCUSSION	26
A. Presence of Reaction Wood Tissues	26
B. Fiber Properties	27
C. Vessel Properties	28
D. Starch Content	29
E. Other Anatomical Effects	29
F. Torsion Wood and Wood Quality	30
CHAPTER VI CONCLUSION	31
REFERENCES	32
GLOSSARY	37
