NIP : 111198501201706201
Pangkat/Gol : Penata/IIIC
Departemen* : Department of Obstetry and Gynecology
Sebagai Dosen Pembimbing Skripsi (Metodologi)

Abstrack Rencana Penelitian :

Background : Preconception care is an effort to prevent morbidity and optimize health services before pregnancy. In Indonesia, particularly in Bantul region, Yogyakarta, men's involvement in preconception care is rare, and research on this subject is limited.

Objectives : To explore men's involvement and factors associated with men's involvement in preconception care in Bantul region, Yogyakarta.

Method : This study will apply a cross sectional observatory methods using survey. Males aged >18 years old bride-to-be, or those planning for conception identified in

the primary care clinics waiting rooms will be invited to participate in the study. They will be asked to fill in questionnaire contained questions about their perception, attitudes and involvement in preconception care, as well factors influencing the utilization of preconception care in primary care. Data collection will be conducted between May to August 2024. The data will be analysed descriptively and sought for any correlation between their perception and involvement in the preconception care with the aid of SPSS-21.

Results: This study will provide data on male's perception and involvement in preconception care in primary care.

Keyword : Preconception care, male involvement, Kabupaten Bantul, maternal and infant mortality.

HASIL REVIEW PERBAIKAN

1. Setuju, Penelitian Dapat Dilanjutkan
..... •
2. Setuju, Perlu Perbaikan / Perubahan Variabel
 - a. Perlu Perbaikan
 - b. Perubahan Variabel
 - c. •
3. Tidak Setuju, Harus Ganti Judul
 - a. Harus Ganti Judul
 - b. Pembimbing Tidak Sesuai Bidanganya
 - c. Pembimbing Materi dan Metodologi Dari Departemen Yang Sama
 - d. Pembimbing Belum Memenuhi Syarat Kepangkatan
 - e.
