APPROVAL SHEET	iv
ACKNOWLEDGEMENT SHEET	v
DECLARATION OF ACADEMIC INTEGRITY	vi
PREFACE	vii
TABLE OF CONTENT	viii
LIST OF TABLES	x
LIST OF FIGURES.....	xi
INTISARI.....	xvi
<i>ABSTRACT</i>	xvii
CHAPTER 1 INTRODUCTION	1
1.1 Background.....	1
1.2 Problem Statement	2
1.3 Objectives	2
1.4 Research Scope and Limitation	3
1.5 Importance of Undertaking the Study.....	3
CHAPTER 2 LITERATURE REVIEW	4
2.1 Introduction.....	4
2.2 Railway Accidents and Evacuation Behaviour in Railway	4
2.3 The Importance of Effective Evacuation	5
2.4 Current Evacuation Studies and Methods.....	6
2.5 Regulation and Standard Implementation in Evacuation.....	8
2.6 Comparative Studies between Real-life Observations and Simulations.....	9
2.7 Comparative Studies Between Indonesia and the UK	11
2.8 Originality of the Study	13
CHAPTER 3 THEORITICAL FRAMEWORK	14
3.1 The Influence of Train Interior Design in Evacuation.....	14
3.2 The Influence of Human Behaviour in Evacuation	14
3.2.1 Pre-Movement and Egress time in Evacuation	17
3.3 Introduction to Evacuation Simulation Techniques.....	19
3.3.1 Classroom-Based Simulation	20
3.4 Existing Regulations and Standard Evacuation	21

CHAPTER 4 RESEARCH METHODOLOGY.....	23
4.1 Literature Review.....	24
4.2 Classroom-Based Evacuation Drill.....	25
4.2.1 Simulation Design and Setup.....	25
4.2.2 Drill Procedure.....	26
4.2.3 Data Collection.....	28
4.3 Analysis of Data.....	30
4.3.1 Quantitative Analysis.....	30
4.3.2 Qualitative Analysis.....	31
4.3.3 Integration of Findings.....	31
CHAPTER 5 RESEARCH FINDINGS AND DISCUSSION.....	32
5.1 Research Findings.....	32
5.1.1 Demographic Data.....	32
5.1.2 Quantitative Data.....	33
5.1.3 Qualitative Data and Survey.....	36
5.2 Discussion.....	45
5.2.1 Procedural Evacuation Simulation.....	45
5.2.2 Natural Behaviour Added Evacuation Simulation.....	47
5.2.3 Statistical Analysis.....	51
5.2.4 Triangulation of Data.....	52
5.2.5 Theoretical Perspectives in Relation to Simulation Results.....	54
5.2.6 Practical Implications and Future Implementation.....	55
5.2.7 Limitations of the Research.....	56
5.2.8 Recommendations and Future Research Directions.....	58
5.2.9 Recommendations and Future Research Directions in Indonesia.....	60
CHAPTER 6 CONCLUSION.....	61
6.1 FINDINGS.....	61
6.2 RECOMMENDATIONS.....	62
REFERENCES.....	63
APPENDIX A – ETHICAL REVIEW & RISK ASSESSMENT FORM.....	67
APPENDIX B – CONSENT FORM.....	78
APPENDIX C – SURVEY QUESTIONARIES.....	79
APPENDIX D – OBSERVATION RESULT.....	82

LIST OF TABLES

Table 1. Overview of Key Studies Directly Related to Train Evacuation Behaviour	7
Table 2. Comparison of Railway Evacuation Practices in Indonesia and the United Kingdom	11
Table 3. Average Number of Rail Trips Per Person Per Year by Age and Gender in 2023 (Department of Transport, 2023)	15
Table 4. Travel Speed Measured when Experimental Trials were Not in Progress (Najmanová et al., 2022).....	15
Table 5. Parameters Used to Model Passenger Walking Speeds (Hui, Su and Peng, 2024) ...	16
Table 6. Parameters Used to Model Passenger Walking Speeds Under Emergency Situation (Hui, Su and Peng, 2024)	16
Table 7. Participants' Pre-movement Activities (Najmanová et al., 2022).....	19
Table 8. Evacuation Time Standard in the UK (Railway Group Standard, 2013).....	21
Table 9. Scenarios of Conventional Procedural Evacuations	26
Table 10. Scenarios of Incorporating Natural Human Behaviour	27
Table 11. Camera Placement and Recording Purpose	28
Table 12. Video observation Indicators for Evacuations Simulations	29
Table 13. Participant Demographics	32
Table 14. Scenario Setup and Evacuation Time	33
Table 15. T-Test Result.....	35

LIST OF FIGURES

Figure 1. Sequence of Passenger Responses in a Fire Train Emergency (Anvari, Nip and Majumdar, 2017)	17
Figure 2. Passenger Behaviour Variables and Diversity of Pre-Movement Time (Anvari, Nip and Majumdar, 2017).....	18
Figure 3. Research Flowchart.....	24
Figure 4. (a) Design of the Layout of Cabin-Like Seating Arrangement; (b) Front and Rear Views	26
Figure 5. Camera Placement	28
Figure 6. Flow Chart of Comparative Analysis	30
Figure 7. (a) Triangulation of Data; (b) Projected Triangulation of Findings to Validate Realistic Human Responses in Evacuation Modelling.....	31
Figure 8. Evacuation Time Per- Scenario (S1 – S10)	34
Figure 9. Comparison of Procedural vs Natural Scenario.....	35
Figure 10. Reduce Focus and Engagement in Later Scenarios	36
Figure 11. Participants Walking in Orderly Fashion with the Absence of Distractions	37
Figure 12. Diverse Passenger Behaviours Prior to Evacuation.....	38
Figure 13. Delayed Start Due to Hesitation	39
Figure 14. Congestion caused by Luggage	39
Figure 15. Participant Helping Impaired.....	40
Figure 16. Participants Move to Other Direction	40
Figure 17. Participant Recording the Situation & Participant Assisting Another Participant .	41
Figure 18. Participant Recognitions of Evacuation (a) First Scenario, (b) second scenario	42
Figure 19. (a) Immediate vs. Delayed Evacuation Actions;(b) Action in Response to Train Crew Announcements	43
Figure 20. Participant Responses to Group Evacuation Behaviour	44
Figure 21. Reduce Focus and Engagement in Later Scenarios	46
Figure 22. Diverse Passenger Behaviours Prior to Evacuation.....	47
Figure 23. Participant Moved to Other Direction	48
Figure 24. Combination of Behaviour in Scenario S10	49
Figure 25. Participant Helping Impaired.....	49
Figure 26. Luggage as Physical Constrain	50
