	Page
TITLE PAGE .....	i
ENDORSEMENT PAGE .....	ii
STATEMENT PAGE .....	iii
PREFACE .....	iv
TABLE OF CONTENTS .....	v
LIST OF TABLES .....	ix
LIST OF FIGURES .....	xi
LIST OF APPENDICES .....	xii
ABSTRACT .....	xiii
INTISARI .....	xiv
<b>I. INTRODUCTION .....</b>	<b>1</b>
A. Background .....	1
B. Statement of Problems .....	3
C. Research Purposes .....	4
D. Research Outputs .....	4
E. Originality .....	5
<b>II. LITERATURE REVIEW AND THEORETICAL BASIS .....</b>	<b>7</b>
A. Literature Review .....	7
1. Potato .....	7
2. Potato Late Blight .....	7
3. <i>Phytophthora infestans</i> .....	8
4. FTA Card and Whatman Paper .....	10
5. Genetic and Population Structure of <i>Phytophthora infestans</i> .....	11
6. Fungicide Resistance .....	14
7. Oxathiapiprolin Active .....	18
8. Molecular Marker for Identification .....	19
9. Molecular Marker for mtDNA Analysis .....	21
10. Molecular Marker (Microsatellite) for Genotyping .....	23
11. Molecular Marker for Oxathiapiprolin Resistance .....	25
B. Theory Basis .....	26
C. Hypothesis .....	28

### **III. CHAPTER I (Validation of Sampling, Isolation, and Identification)**

<b>Technique for <i>Phytophthora infestans</i>: Species and Mating Type .....</b>	<b>29</b>
A. Introduction .....	29
B. Research Methodology .....	31
1. Materials and Equipment .....	31
1.1. Materials .....	31
1.2. Equipment .....	31
2. Time and Location .....	31
3. Procedure .....	32
3.1. Sampling, pure culture and DNA isolation .....	32
3.2. Species and mating type identification .....	32
3.3. DNA sequencing and phylogenetic tree .....	33
3.4. In Silico RFLP and alternative restriction enzyme .....	34
C. Result and Discussion .....	37
1. Sampling and DNA isolation .....	37
2. Species identification: molecular and morphology technique .....	39
3. Species identification: DNA sequencing and phylogenetic tree ....	40
4. Mating type identification: molecular marker, pairing test and RFLP .....	45
5. Mating type identification: DNA sequencing and phylogenetic tree	47
6. Mating type identification: In Silico RFLP .....	50

### **IV. CHAPTER II (Fungicide Sensitivity in *Phytophthora infestans* is Determined by Genotype and OSBPI Mutations)**

.....	53
A. Introduction .....	53
B. Research Methodology .....	55
1. Materials and Equipment .....	55
1.1. Materials .....	55
1.2. Equipment .....	55
2. Time and Location .....	55
3. Procedure .....	56
3.1. Sampling, isolation and field resistance determination interviews .....	56
3.2. Fungicide sensitivity test .....	57
3.3. Detection of mutations on OSBPI .....	58

3.4. Genotyping and population genetic structure analysis .....	58
C. Result and Discussion .....	63
1. Sampling, isolation and field resistance-related interviews .....	63
2. Species and mating type identification .....	65
3. Phenotyping and fungicide sensitivity test (EC50) .....	67
4. OSBPI mutation analysis .....	71
5. Genotyping for genetic variability analysis .....	75
6. Population genetic structure analysis .....	79
<b>V. CHAPTER III (Mitochondrial DNA Reveals Origin and Population</b>	
<b>Genetics of <i>Phytophthora infestans</i> in Java Island)</b> .....	83
A. Introduction .....	83
B. Research Methodology .....	85
1. Materials and Equipment .....	85
1.1. Materials .....	85
1.2. Equipment .....	85
2. Time and Location .....	85
3. Procedure .....	85
3.1. Sampling and DNA isolation .....	85
3.2. Molecular species identification .....	86
3.3. mtDNA: marker optimization and characterization .....	86
3.4. Population genetic analysis based on mtDNA .....	87
C. Result and Discussion .....	90
1. Sampling and species identification .....	90
2. mtDNA marker optimization and haplotype characterization .....	90
3. Resistance status survey related to haplotypes .....	97
4. Population genetic analysis .....	98
<b>VI. CHAPTER IV (Microsatellite-Based Population Genetics of</b>	
<b><i>Phytophthora infestans</i> and Emerging Fungicide Resistance in Java</b>	
<b>Island)</b> .....	103
A. Introduction .....	103
B. Research Methodology .....	105
1. Materials and Equipment .....	105
1.1. Materials .....	105
1.2. Equipment .....	105
2. Time and Location .....	105

3. Procedure .....	105
3.1. Sampling and fungicide resistance survey .....	105
3.2. Species and mating type identification .....	106
3.3. Phenotypic analysis .....	106
3.4. Microsatellite for population genetic analysis .....	106
C. Result and Discussion .....	110
1. Sampling and fungicide resistance survey .....	110
2. Species, mating type and genotype identification .....	117
3. Phenotypic analysis .....	120
4. Genetic variability .....	127
5. Population structure .....	132
<b>VII. GENERAL DISCUSSION .....</b>	<b>135</b>
<b>VIII. CONCLUSION AND SUGGESTIONS .....</b>	<b>147</b>
A. CONCLUSION .....	147
B. SUGGESTIONS .....	148
<b>REFERENCE .....</b>	<b>149</b>

## LIST OF TABLES

	Page
Table 1	Research originality (past and now) ..... 6
Table 2	List of sample collection ..... 35
Table 3	List of markers ..... 36
Table 4	List of amplification result from Figure 1 for <i>Phytophthora infestans</i> ..... 38
Table 5	Sampling location and type of <i>Phytophthora infestans</i> samples across Java Island, Indonesia ..... 60
Table 6	List of markers used ..... 61
Table 7	List of the active ingredients of the fungicides tested ..... 62
Table 8	List of samples based on resistance level and fungicide application ..... 64
Table 9	The list of samples based on mating type and phenotypic examination based on metalaxyl sensitivity ..... 69
Table 10	EC <sub>50</sub> and sensitivity levels of <i>Phytophthora infestans</i> collected from across Java Island against several fungicide actives ..... 70
Table 11	List of mutation sites for each representative sequence isolate ..... 74
Table 12	The list of samples identified based on SSR fingerprints using four loci showed clonal lineage (multi loci genotype) from SSR matcher and mating analysis results employing molecular, pairing test and matcher ..... 77
Table 13	The molecular analysis of variance (AMOVA) based on the allelic distance matrix for gene flow f-statistics analysis using four simple sequence repeat (SSR) markers for the <i>Phytophthora infestans</i> populations collected from across Java Island, Indonesia ..... 78
Table 14	The genetic parameters of the six populations of <i>Phytophthora infestans</i> from Java Island, Indonesia, based on heterozygosity, f-statistics, and polymorphism for the codominant data ..... 78
Table 15	F-statistics and estimates of Nm in all the populations for each locus ..... 78
Table 16	List of sampling locations ..... 88
Table 17	List of mtDNA markers ..... 89
Table 18	mtDNA result based on fragment present from 1.5% agarose gel of PCR – RFLP ..... 94
Table 19	AMOVA PhiPT ..... 101
Table 20	Genetic diversity based on mtDNA band frequency ..... 101
Table 21	Pairwise population matrix of Nei genetic distance ..... 102
Table 22	List of samples ..... 108
Table 23	List of markers ..... 109
Table 24	List of samples based on resistance status, type and frequent of fungicide application from personal interview with farmers .. 112

Table 25	List of samples based on SSR (simple sequence repeat) genotyping (four loci, SSR matcher), mating type (SSR matcher, PCR, and Pairing), and phenotyping based on sensitivity to metalaxyl .....	121
Table 26	Genotypes identified based on SSR matcher and populations detected .....	126
Table 27	AMOVA based on the allelic distance matrix for gene flow f-statistics analysis using four SSR markers for the <i>Phytophthora infestans</i> population samples collected across Java Island, Indonesia .....	129
Table 28	Genetic parameters of the seven populations of <i>P. infestans</i> collected in Java Island, Indonesia based on heterozygosity, f-statistics, and polymorphism by population for codominant data .....	129
Table 29	F-statistics and estimates of Nm in all populations for each locus .....	130
Table 30	Genetic distance among populations based on the Nei Distance .....	130

## LIST OF FIGURES

		Page
Figure 1	1.5% Agarose electrophoresis gel of DNA amplified by primer PINTH2-F/R (A); O8-1F/2R (B); and O8-3F/4R (C) with different DNA isolation technique .....	37
Figure 2	Morphological character of pure culture isolate (macroscopic and microscopic) resulted from infected leaves isolation .....	39
Figure 3.1	Phylogenetic analysis based on DNA sequencing using primer PINTH2-F/R .....	41
Figure 3.2	Phylogenetic analysis based on DNA sequencing using primer O8-1F/2R .....	42
Figure 3.3	Phylogenetic analysis based on DNA sequencing using primer O8-3F/4R .....	43
Figure 4	1.5% Agarose electrophoresis gel to visualize PCR product resulted from DNA amplification by primer mating type (W16-1F/2R) with different DNA isolation technique .....	46
Figure 5	Pairing test of <i>P. infestans</i> on V-8 Agar Media .....	47
Figure 6	Phylogenetic analysis based on DNA sequencing using primer mating type (W16-1F/R) .....	48
Figure 7	In-silico RFLP of PCR product (primer W16-1F/R) using two isolates (#3 and #19) .....	52
Figure 8	Sampling location of the isolates and DNA samples collected across Java Island during 2022–2024. ....	60
Figure 9	Phylogenetic tree of <i>Phytophthora infestans</i> was constructed by MEGA 11 .....	66
Figure 10.1	Macro-microscopic appearance of pure culture <i>P. infestans</i> isolates (isolate #5 - #35) under 60X magnifications of microscope .....	67
Figure 10.2	Macro-microscopic appearance of pure culture <i>P. infestans</i> isolates (isolate #37 - #42) under 60X magnifications of microscope .....	67
Figure 11	1.5% electrophoresis agarose gel for 245 bp PCR product of specific marker (O8-1F/2R) for species identification .....	82
Figure 12	Population structure analysis based on the Bayesian clustering model utilizing Structure.2.3.4 .....	93
Figure 13	1.5% agarose gel to visualize PCR-RFLP product for mtDNA characterization .....	97
Figure 14	Resume mtDNA analysis result.....	94
Figure 15	Resume fungicide resistance level survey.....	117
Figure 16	Population structure analysis applying the Bayesian clustering model using the Structure.2.3.4 .....	134

## LIST OF APPENDICES

	Page
Appendices A List of abbreviations .....	166
Appendices B NCBI blast result of 3 primers (PINTH2-F/R, O8-1F/2R, O8-3F/4R) .....	170
Appendices C NCBI blast result of primer W16-1F/2R .....	173
Appendices D NCBI blast result of primer O8-1F/2R .....	174
Appendices E Food poison bait resulted from several isolates (#5, #6, #8) against fungicide solo and double actives showed different in genotype, mating type, diameter of colony, % colony inhibition, EC50 probit and resistance level. Resistance level was grouped based on category: resistance (R, <30%), moderate resistance (MR, 30 - 40%), less sensitive (LS, 40 - 60%), sensitive (S, >60%) .....	177
Appendices F Mutation analysis of OSBPI sequence .....	182
Appendices G Evanno curve chapter 2 .....	189
Appendices H Evanno curve chapter 4 .....	190
