PLAGIARISM-FREE STATEMENT	4
Table of Contents	5
List of Tables	10
Table of Figures.....	10
Abstract	12
<i>Ikhtisar</i>	14
Preface.....	16
Chapter 1. Introduction	18
1.1. Problem Background	18
1.2. Problem Definition	25
1.3. Research Questions.....	30
1.4. Objectives.....	31
1.5. Motivation of the Dissertation	31
1.6. Benefits of the Dissertation	33
1.7. Contributions of the Study.....	34
1.7.1. Practical Contributions	34
1.7.2. Theoretical and Design Contributions	35
1.7.3. Policy Contributions.....	36
1.8. Scope and Limitations of the Study.....	37
1.9. Organization of the Study.....	39
Chapter 1: Introduction.....	39
Chapter 2: Theoretical Framework and Literature Review.....	39
Chapter 3: Research Method	40
Chapter 4: Results and Discussion	40
Chapter 5: Conclusion	41
Chapter 2. Theoretical Framework and Literature Review	42
2.1. Theoretical Framework	42

2.1.1. Fear and Decision-Making.....	42
2.1.2. FOMO Conceptualization.....	43
2.1.3. Cognitive and Affective FOMO Conceptualization.....	44
2.1.4. Herding Types: Rational and Irrational.....	51
2.1.5. Time Pressure.....	54
2.2. Literature Review and Hypotheses Development.....	56
2.2.1. FOMO Types and Investment Behavior.....	56
2.2.2. Herding Cues and Investment Behavior.....	58
2.2.3. Time Pressure and Investment Behavior.....	60
2.2.4. Moderating Effect of Time Pressure.....	62
Chapter 3. Research Method.....	66
3.1. Research Design.....	66
3.2. Variable Operational Definition.....	71
3.2.1. Independent Variables.....	71
3.2.2. Dependent Variable.....	74
3.3 Population and Sample.....	75
3.3.1. Target Population and Sample Characteristics.....	75
3.3.2. Sample Size Determination.....	77
3.3.3. Sampling Method and Inclusion Criteria.....	78
3.3.4. Recruitment Strategy and Justifications.....	79
3.3.5. Ethical Considerations.....	82
3.4 Research Instruments.....	82
3.5. Data Collection Methods.....	86
3.5.1. Environment Setting.....	86
3.5.2. Web Application Layout and Functions.....	88
3.5.3. Offline Manipulation via Confederates.....	91
3.5.4. Independent Variable Manipulations.....	94
3.5.5. Pilot Test and Device Calibration.....	100
3.5.6. Manipulation Checks.....	101
3.5.7. Investment Behavior Indicators.....	104

3.6. Experimental Procedures.....	106
3.7. Data Analysis and Hypothesis Testing	109
3.7.1. Assumptions Check and Data Preparation	111
3.7.2. Clustering, Dependence, and Robustness Analyses	111
3.7.3. Manipulation-Check Analyses.....	112
3.7.4. Reporting Conventions	113
3.8.1. Internal Validity	114
3.8.2. Construct Validity	115
3.8.3. Statistical Conclusion Validity	115
3.8.4. External and Ecological Validity	116
Chapter 4. Results and Discussion.....	117
4.1 Data preparation and screening.....	118
4.2 Participants and sample characteristics.....	120
4.2.1 Recruitment and eligibility.....	120
4.2.2 Attendance, randomization, and session delivery.....	120
4.2.3 Exclusions and reruns.....	121
4.2.4 Final analytic sample.....	121
4.2.5 Descriptive profile.....	121
4.2.6 Sample adequacy and randomization rationale	123
4.2.7. Interrelationship among behavior outcomes.....	123
4.3 Manipulation checks.....	124
4.3.1 Self-report checks	124
4.3.2 Physiological manipulation checks	126
4.3.3. Manipulation checks results	127
4.4 Data extraction and construction of dependent variables.....	130
4.4.1 Raw sources.....	130
4.4.2 Event parsing and session validation.....	131
4.4.3 Participant-level aggregation.....	131
4.4.4 Operational definitions of dependent variables	132
4.4.5 Analysis dataset structure	132

4.4.6 Data preparation and screening	133
4.5 Hypotheses testing and main results.....	133
4.5.1 Analytic approach	133
4.5.2 Cognitive versus affective FOMO	135
4.5.3 Rational versus irrational herding.....	137
4.5.4 The effect of time pressure.....	138
4.5.5 Time pressure as a moderator.....	140
4.5.6 Three-way configuration of FOMO, herding, and time pressure	142
4.5.7 Summary of findings.....	144
4.6 Robustness checks and validity of ANOVA model	145
4.6.1 Homogeneity of variance and design balance	145
4.6.2. Independence of observations	147
4.6.3 Convergent evidence from physiological change scores	149
4.6.4 Summary of model robustness and validity	150
4.7. Discussion and Implications	152
4.7.1. Theoretical Synthesis.....	152
4.7.2. Practical Implications	155
4.7.3. Policy Implications.....	156
5. Conclusions.....	156
5.1 Overview of findings	156
5.2 Summary of Contributions	157
5.3 Limitations.....	159
5.4 Directions for future research	160
5.5 Conclusion.....	161
References	162
Appendix A. Hybrid Manipulations	178
Appendix B. Instruments, Pilot Test and Device Calibration.....	183
Appendix C. Reliability and validity of instruments	187
Appendix D. Results	190
D1. FOMO TYPE	190

D1.1. HHI.....	190
D1.2. Risk Level	191
D1.3. Decision Time.....	192
D1.4. Points Invested.....	193
D1.5. Diversification	194
D2. HERD TYPE.....	195
D2.1. HHI.....	195
D2.2. Risk Level	196
D2.3. Decision Time.....	197
D2.4. Points Invested.....	198
D2.5. Diversification	199
D3. TIME PRESSURE.....	200
D3.1. HHI.....	200
D3.2. Risk Level	201
D3.3. Decision Time.....	202
D3.4. Points Invested.....	203
D3.5. Diversification	204
D4. Moderations	205
D4.1. HHI.....	206
D4.2. Risk Level	207
D4.3. Decision Time.....	208
D4.4. Points Invested.....	209
D4.5. Diversification	210
D5. Physiological Results	211
D5.1. Heart Rate.....	211
D5.2. RMSSD.....	212
D5.3. SDNN	213
D6. Bootstrap GLM Parameters	214
Appendix E. Data	215
E1. Independent Variable.....	215

E2. Dependent Variable.....	221
Appendix F. Processing of HR and HRV measures (Δ HR, Δ RMSSD, Δ SDNN).....	229

List of Tables

Table 3.1. Factorial Design.....	67
Table 3.2. Behavioral indicators used to operationalize strategic vs impulsive investment behavior.....	75
Table 4.1. Participant characteristics and sample flow	122
Table 4.2. Cronbach's alpha summary for manipulation-check scales (N = 160)	125
Table 4.3. Physiology Means by Scenario.....	127
Table 4.4. Self-report manipulation checks	128
Table 4.5. Physiological manipulation checks.....	129
Table 4.6. Dependent variable construction	132
Table 4.7. Main effect.....	134
Table 4.8. Interaction effect.....	134
Table 4.9. Summary of findings.....	144
Table 4.10. Levene's test of equality of error variances	147
Table 4.11. Physiological change scores in the $2 \times 2 \times 2$ ANOVA (Type III main effects).....	149
Table A.1. Summary of confederate cue scripts for the eight $2 \times 2 \times 2$ scenarios.....	181
Table B.1. Self-reported Items.....	183
Table B.2. Pilot (n=30): Reliability and descriptives.....	184
Table B.3. Pilot (n=30): Directional sensitivity (pooled comparison across cell).....	184
Table B.4. Device calibration results.....	184
Table D.1. Moderating labels.....	205
Table E.1. Independent Variable Raw Data.....	215

Table of Figures

Figure 2.1. Conceptual Framework Diagram.....	65
Figure 3.1. Experiment Room Layout.....	88
Figure A.1. Rational herding (web app). Information-based cues present: analyst recommendation split, written 'reason', valuation metric (PER), and three-month profit outlook. Cue directs attention to evaluable signals rather than popularity.....	178
Figure A.2. Irrational herding induction. The "Viral News & Influencer" carousel flashes and auto-rotates, highlighting crowd prompts with no fundamentals shown.	179
Figure A.3. Cognitive FOMO induction. "Benchmark Profit – Decision Feedback – Market Tips – Progress" panel foregrounds competence and self-direction with no social cues.....	179

Figure A.4. Affective FOMO induction. “Popular Stocks,” “Recent Purchases,” and “Community Posts” panels highlight peer activity and inclusion with no analytical metrics.	180
Figure A.5. Time-pressure induction. “Total time remaining” with alternating Cooldown (buy disabled) and Buy window (buy enabled) states constrains decision time. Music is automatically played accordingly.	181
Figure B.1. G*Power A priori sample power analysis.....	186
