PNEUMATIC COITVEYOR FOR CONVEYING FLY ASH AT COAL-FIRED STEAM POWER PLANT
Mudrix Rakasiwi, Ir. Gregorius Harjanto
Universitas Gadjah Mada, 2007 | Diunduh dari http://etd.repository.ugm.ac.id/

# CONTENTS

**TITLE**..... i
**LEGALIZATION**..... ii
**STATEMENT**..... iii
**MANUSCRIPT OF SCRIPT**..... iv
**MOTTO AND DEDICATION**..... v
**ABSTRACT**..... vi
**PREFACE**..... vii
**CONTENTS**..... viii
**LIST OF FIGURES**..... xii
**LIST OF TABLES**.....xv
**LIST OF APPENDIXES**.....xvii
**ABBREVIATIONS AND SYMBOLS LIST**.....xviii

**CHAPTER I INTRODUCTION**..... 1
1.1. General..... 1
1.2. Problem Formulated.....2
1.3. Problem Limitation.....3
1.4. Purpose of the Design..... 3
1.5. Advantage of the Design.....3

**CHAPTER II PNEUMATIC CONVEYING**.....4
2.1. Conveying Machines..... 4
2.2. Pneumatic Conveyors..... 5
2.2.1. Classification of pneumatic conveyors... .....5
2.2.2. Parts of pneumatic conveyors..... 10
2.3. Fundamentals of Fluid Flow and Thermodynamics.....17
2.3.1. The law of conservation of matter.....18

PNEUMATIC COITVEYOR FOR CONVEYING FLY ASH AT COAL-FIRED STEAM POWER PLANT
Mudrix Rakasiwi, Ir. Gregorius Harjanto
Universitas Gadjah Mada, 2007 | Diunduh dari http://etd.repository.ugm.ac.id/

2.3.2. The law of conservation of energy.....19
2.3.3. Thermodynamics.....20
2.3.4. Horse power required to compress gas.....21
2.4. Piping System.....22
2.4.1. Piping codes and standards..... 22
2.4.2. Piping materials..... 23
2.4.3. Materials specifications..... 24
2.4.4. Pipe size.....26

**CHAPTER III PNEUMATIC SYSTEM DESIGN CALCULATION** 27
3.1. Conveying Pipe..... 28
3.1.1. Pipe size..... 28
3.1.2. Pipe materials..... 30
3.1.3. Selection of conveying velocity ..... 31
3.1.4. Calculating material to air ratio (R).....32
3.1.5. Total equivalent length system ..... 34
3.1.6. Determining the TEL $_{system}$ ..... 43
3.2. Piping Component .....50
3.2.1. Fittings ..... 50
3.2.2. Flanges ..... 53
3.2.3. Valves ..... 57
3.3. Pressure Integrity of Piping System.....61
3.3.1. Minimum pipe wall thickness. ..... 61
3.3.2. Pressure and temperature rating in-line components.....64
3.4. Piping Support .....65
3.4.1. Types of pipe support.....65
3.4.2. Support location.....66
3.4.3. Pipe spacing.....67
3.4.4. Support calculation.....68
3.5. Pipe Joint.....73
3.5.1. Selection of bolts and nuts for flanges.....75

3.5.2. Gasket selection.....77
3.6. Air Mover.....79
3.6.1. Selection of compressor .....79
3.6.2. Volume air required at the outlet of the compressor .....82
3.6.3. Required motor power of the compressor .....84
3.6.4. Selection of screw compressor oil .....85
3.7. Electrical Motor Selection.....86
3.7.1. Selecting electrical motor .....86
3.7.2. Connection of compressor shaft and electrical motor.....89
3.8. Transport Vessel.....90
3.8.1. Dimensions and material selection of the transporter .....92
3.8.2. Design pressure and temperature .....94
3.8.3. Shell thickness calculation .....96
3.8.4. Reinforcing required for opening in formed head.....101
3.8.5. Wind load consideration.....109
3.8.6. Piping loads consideration .....111
3.8.7. Seismic loads consideration .....111
3.8.8. Calculation of support leg columns, base plate and bolts.....116

**CHAPTER IV AUXILIARY EQUIPMENT**.....128
4.1. Ash Storage Silo.....128
4.2. Air Dryer.....131
4.3. Receiver Tank.....132
4.4. Bag Filter.....135
4.5. Exhaust Fan.....137

**CHAPTER V OPERATION AND MAINTENANCE**.....139
5.1. Operation.....139
5.1.1. Inspection before start up.....139
5.1.2. Start up of pneumatic conveyor.....140

5.2. Maintenance..... 141

CHAPTER VI SUMMARY ..... 143

6.1. General Specification..... 143

6.2. Specification of the Component..... 143

6.3. Design Analysis..... 152

REFERENCE..... 155

APPENDIX..... 157
