UNIVERSITAS
GADJAH MADA
FOOD WASTE PROCESSING USING ANAEROBIC DIGESTION: INFLUENCE OF TEMPERATURE AND COMPOSITION
Khairunnisa Nur Madani, Lisendra Marbelia, S.T., M.Sc., Ph.D.
Universitas Gadjah Mada, 2026 | Diunduh dari http://etd.repository.ugm.ac.id/

LIST OF CONTENTS

VALIDITY SHEET ..... **ii**
LIST OF CONTENTS ..... **iii**
LIST OF TABLES ..... **vi**
LIST OF FIGURES ..... **vii**
LIST OF NOTATIONS ..... **viii**
LIST OF ABBREVIATION ..... **ix**
CHAPTER I INTRODUCTION **1**
1.1 The Background of Study 1
1.2 The Problem Statements 3
1.3 Originality / Novelty of Research 3
1.4 Research Purposes 7
1.5 Benefit of Research 7
CHAPTER II LITERATURE REVIEW **8**
2.1 Food Waste 8
2.2 Anaerobic Digestion 10
2.2.1 Anaerobic digestion mechanism 11
2.2.2 Factors Affecting Anaerobic Digestion 12
2.3 Anaerobic Digestion of Food waste 23
2.4 Theoretical Basic 25
2.5 Hypotheses 28
CHAPTER III RESEARCH METHODS **30**
3.1 Material 30
3.1.1 Substrate 30
3.1.2 Inoculum 30
3.1.3 Analysis Test Material 30
3.2 Equipment 31
3.3 Research Procedures 33
3.3.1 Substrate Preparation 34
3.3.2 Inoculum Preparation 34
3.3.3 Digestion Process 34
3.3.4 Response Surface Methodology 34
3.4 Research Data Observation 35

FOOD WASTE PROCESSING USING ANAEROBIC DIGESTION: INFLUENCE OF TEMPERATURE AND COMPOSITION
Khairunnisa Nur Madani, Lisendra Marbelia, S.T., M.Sc., Ph.D.
Universitas Gadjah Mada, 2026 | Diunduh dari http://etd.repository.ugm.ac.id/

3.4.1 Yield Biogas 35
3.4.2 Chemical Oxygen Demand (COD) 35
3.4.3 Volatile Fatty Acid (VFA) 35
3.4.4 pH Measurement 36
3.4.5 C/N Ratio 36
3.4.6 Microbial Community Sequencing 36
3.4.7 Total Solid (TS) 36
3.4.8 Volatile Solid (VS) 36
3.5 Research Variable 36
3.6 Data Analysis 36
CHAPTER IV 38
RESULT AND DISCUSSION 38
4.1 Effect of Substrate Composition on Anaerobic Digestion Performance 38
4.1.1. Experimental Results 38
4.1.2. Kinetic Data 41
4.2 Effect of Temperature on Anaerobic Digestion Performance 46
4.2.1. Regression data 46
4.2.2. Ternary plot 51
4.3 Effect of Substrate Composition and Temperature on Microbial Community 58
CHAPTER V 63
CONCLUSION 63
5.1 Conclusion 63
5.2 Suggestion 64
BIBLIOGRAPHY 65

LIST OF TABLES

Table 1.1 Previous Research 4
Table 2.1 Composition of food waste 9
Table 2.2 Literature of anaerobic digestion of food waste with different type of reactor 16
Table 2.3 Literature of anaerobic digestion of food waste with different temperature 18
Table 2.4 Literature of anaerobic digestion of food waste with different Organic Loading Rate 19
Table 2.5 Type of oil in the addition of inhibitors to anaerobic digestion 21
Table 2.6 Literature of anaerobic digestion of food waste with different pretreatment of substrate 23
Table 2.7 Anaerobic digestion reactor conditions of food waste 25
Table 2.8 Comparison of Kinetic Models Commonly Applied in Anaerobic Digestion Studies 26
Table 3.1 Thermophilic and Mesophilic Batch Experimental Design 31
Table 3.2 Analysis of mesophilic batch data 37
Table 3.3 Analysis of Thermophilic batch data 37
Table 4.1 Kinetic Parameters and Measured Responses in the Mesophilic Anaerobic Digestion Process with Variations in Substrate Composition 42
Table 4.2 Kinetic Parameters and Measured Responses in the Thermophilic Anaerobic Digestion Process with Variations in Substrate Composition 43
Table 4.3 Mixture regression coefficients (truncated to two decimal places) representing the contributions of food waste in Anaerobic Digestion mesophilic 47
Table 4.4 Mixture regression coefficients (truncated to two decimal places) representing the contributions of food waste in Anaerobic Digestion thermophilic 48

LIST OF FIGURES

Figure 2.1 Anaerobic Digestion Scheme (Yadav et al., 2022) 10
Figure 2.2 Microbial community of Anaerobic Digestion (a) Microbial community of methanogenesis process (b) 13
Figure 2.3 Conceptual Framework of the Relationship between Substrate Composition, Microbial Activity, and Kinetic Parameters on Biogas Performance in the Anaerobic Digestion Process 25
Figure 3.1 Anaerobic Digestion batch reactor biogas production equipment scheme 31
Figure 3.2 Anaerobic Digestion thermophilic batch reactor biogas production equipment scheme 32
Figure 3.3 Research experiment flow chart 33
Figure 4.1 COD graph against time (A) Mesophilic system and (B) Thermophilic system ... 38
Figure 4.2 Graph of VFA against time (A) Mesophilic system and (B) Thermophilic system 39
Figure 4.3 Graph of CH_4 yield against time (A) Mesophilic system and (B) Thermophilic system 40
Figure 4.4 Graph of CO_2 yield against time (A) Mesophilic system and (B) Thermophilic system 41
Figure 4.5 Ternary contour plot of $\mu_{max,1}$ and Ks_1 (A; B) Mesophilic and (C; D) Thermophilic system 51
Figure 4.6 Ternary contour plot of $Y_{VFA/X1}$ (A) Mesophilic and (B) Thermophilic system 53
Figure 4.7 Ternary contour plot of $\mu_{max,2}$, Ks_2 and CH_4 yield (A – C) Mesophilic and (D – F) Thermophilic system 54
Figure 4.8 Ternary contour plot of ηCOD and CO_2 yield (A; B) Mesophilic and (C; D) Thermophilic system 56
Figure 4.9 Comparative abundance of total bacterial and archaeal reads in Various Substrate Compositions in (A) Mesophilic and (B) Thermophilic conditions 58
Figure 4.10 Bacterial community composition at the family level (A) Mesophilic system) and (B) Thermophilic system. 59
Figure 4.11 Archaeal community composition at the family level (A) Mesophilic system) and (B) Thermophilic system. 61
