LIST OF FIGURE 9
ABSTRACT 11
INTISARI 12
CHAPTER 1 INTRODUCTION 13
1.1 Background 13
1.2 Problem Identification 15
1.3 Research Objective 15
1.4 Scope of Work and Limitations 15
1.5 Significance of the Study 16
CHAPTER 2 LITERATURE REVIEW 17
2.1 Floating Pontoons and Floating Breakwaters as Wave-Responsive Structures 17
2.2 Pontoon Geometry and Width-Related Hydrodynamic Response 18
2.3 Motion Response of Moored Floating Pontoons 19
2.4 Serviceability Indicators for Pontoon Users 21
2.5 Mooring Response and Restrained-Body Behaviour 21
2.6 Numerical Modelling of Wave-Structure Interaction Using SPH 22
2.7 Summary of Previous Studies 24
2.8 Research Originality 27
CHAPTER 3 THEORETICAL BACKGROUND 28
3.1 Smoothed Particle Hydrodynamics 28
3.1.1 Integral Interpolants 28
3.1.2 Kernel Function 29
3.1.3 Continuity Equation 31
3.1.4 Momentum Equation and Dissipative Treatment 31

3.1.5 Equation of State 33
3.1.6 Particle Motion 33
3.2 Regular and Irregular Waves 33
3.2.1 First-Order, Second-Order Wave, and Higher-Order Wave 34
3.2.2 Statistical and Spectral Description of an Irregular Sea State 35
3.2.3 Pierson-Moskowitz and JONSWAP Spectra 35
3.2.4 Continuum Governing Equations for Free-Surface Flow 36
3.2.5 Potential-Flow Reduction, Linearization, and the Dispersion Relation 37
3.2.6 Wave-induced Force on Floating Structures 37
3.3 Wave Reflection, Transmission, and Wave-Field Transformation 38
3.3.1 Incident, Reflected, and Transmitted Wave Components 38
3.3.2 Reflection and Transmission Coefficient 38
3.4 Six-Degree-of-Freedom Motions of a Floating Pontoon 38
3.4.1 Translational Motions 39
3.4.2 Rotational Motions 39
3.5 Serviceability Indicators 39
3.6 Dimensional Analysis 40
CHAPTER 4 RESEARCH METHOD 42
4.1 Introduction 42
4.2 Tools, Input Data, and Computational Resources 44
4.2.1 Computational Tools 44
4.2.2 Hardware Specification 44
4.3 Numerical Model Setup 45
4.3.1 Defined Constants and Fluid Properties 45
4.3.2 Execution and SPH Numerical Parameters 46
4.3.3 Wave Input and AWAS Configuration 48
4.3.4 Floating Body Configuration 50
4.3.5 Equivalent Mooring Configuration 52
4.3.6 Simulation Layouts and Case Definition 55
4.4 2D Wave Verification and Wave-Field Transformation Analysis 57
4.4.1 Wave Verification Method 57
4.4.2 Incident, Reflected, and Transmitted Wave Separation 59
4.4.3 Wave-Field Transformation Assessment 61

4.5 3D Coupled Simulation and Response Analysis 61
4.5.1 Motion Response Processing 61
4.5.2 Safety and Comfort Screening 63
4.5.3 Additional Mooring Tension Analysis 64
CHAPTER 5 RESULT AND DISCUSSION 65
5.1 Wave Verification Results 65
5.2 Wave-Field Transformation Results 67
5.2.1 Incident, Reflected, and Transmitted Waves 67
5.2.2 Reflection and Transmission Coefficients and Width Effect on Wave Transformation 69
5.3 Pontoon Motion Response 71
5.3.1 Translational Motions 71
5.3.2 Rotational Motions 74
5.4 Serviceability Assessment 76
5.4.1 Comfort Indicators 76
5.4.2 Safety Indicators 78
5.5 Equivalent Mooring Tension Response 81
5.5.1 Peak Tension Distribution and Utilization 81
5.5.2 Governing Mooring Response and Non-Dimensional Relationship 84
5.5.3 Event-Based Hydrodynamic Force-Mooring-Line Elongation Link 87
CHAPTER 6 CONCLUSION AND RECOMMENDATION 91
6.1 Conclusion 91
6.2 Recommendation 92
REFERENCE 93
