| <b>ABSTRACT .....</b>                                                                                               | <b>xi</b>   |
| <b>INTISARI .....</b>                                                                                               | <b>xii</b>  |
| <b>CHAPTER I INTRODUCTION.....</b>                                                                                  | <b>1</b>    |
| 1.1. Research Background .....                                                                                      | 1           |
| 1.2. Problem Statement.....                                                                                         | 4           |
| 1.3. Research Objectives.....                                                                                       | 5           |
| 1.4. Research Significance.....                                                                                     | 5           |
| <b>CHAPTER II LITERATURE REVIEW.....</b>                                                                            | <b>6</b>    |
| 2.1. Rice ( <i>Oryza sativa</i> L.).....                                                                            | 6           |
| 2.2. Polished Rice .....                                                                                            | 6           |
| 2.3. Unpolished Rice.....                                                                                           | 7           |
| 2.3.1. Non-pigmented unpolished rice.....                                                                           | 8           |
| 2.3.2. Pigmented unpolished rice.....                                                                               | 9           |
| 2.4. Germination in Rice.....                                                                                       | 9           |
| 2.5. Changes in Fatty Acid and Amino Acid Profiles, GABA, $\gamma$ -Oryzanol, and Vitamins during Germination ..... | 13          |
| 2.6. Health Benefits of the Analyzed Compounds .....                                                                | 15          |
| 2.7. Hypothesis .....                                                                                               | 16          |
| <b>CHAPTER III MATERIALS AND METHODS .....</b>                                                                      | <b>17</b>   |
| 3.1. Research Location and Period .....                                                                             | 17          |
| 3.2. Materials .....                                                                                                | 17          |
| 3.3. Instruments and Equipment.....                                                                                 | 18          |
| 3.4. Experimental Procedure.....                                                                                    | 18          |
| 3.4.1. Rice sample preparation.....                                                                                 | 19          |
| 3.4.2. Rice germination.....                                                                                        | 20          |
| 3.4.3. Drying and grinding.....                                                                                     | 20          |
| 3.5. Analytical Methods.....                                                                                        | 21          |
| 3.5.1. Fatty acid analysis.....                                                                                     | 21          |
| 3.5.2. Amino acid analysis.....                                                                                     | 22          |
| 3.5.3. GABA analysis .....                                                                                          | 23          |

|                                                              |           |
|--------------------------------------------------------------|-----------|
| 3.5.4. $\gamma$ -Oryzanol analysis.....                      | 24        |
| 3.5.5. Vitamin E analysis (tocopherol) .....                 | 25        |
| 3.5.6. Vitamin K analysis (phyloquinone).....                | 25        |
| 3.6. Experimental Design .....                               | 27        |
| 3.7. Statistical Analysis.....                               | 27        |
| <b>CHAPTER IV RESULTS AND DISCUSSION .....</b>               | <b>29</b> |
| 4.1. Fatty Acid Profile .....                                | 29        |
| 4.2. Amino Acid Profile.....                                 | 32        |
| 4.3. GABA ( $\gamma$ -aminobutyric acid) .....               | 35        |
| 4.4. $\gamma$ -Oryzanol .....                                | 37        |
| 4.5. Vitamin E.....                                          | 40        |
| 4.6. Vitamin K .....                                         | 42        |
| 4.7. Chemical Changes and Their Functional Implications..... | 44        |
| <b>CHAPTER V CONCLUSION .....</b>                            | <b>48</b> |
| 5.1. Conclusion .....                                        | 48        |
| 5.2. Recommendations.....                                    | 49        |
| <b>BIBLIOGRAPHY .....</b>                                    | <b>51</b> |
| <b>APPENDICES .....</b>                                      | <b>63</b> |
