INTISARI xvii
CHAPTER 1 INTRODUCTION 19
I.1 Research Background 19
I.2 Problem Statement 21
I.3 Research Objectives 22
I.4 Research Questions 22
I.5 Scope Of The Research 23
I.6 Research Benefits 24
I.7 Literature Review 24
CHAPTER II THEORETICAL BACKGROUND 28
II.1 State Authority Over Maritime Zones 28
II.2 Maritime Zones under UNCLOS 1982 28
II.2.1 Internal Waters 29
II.2.2 Territorial Sea 29
II.2.3 Contiguous Zone 30
II.2.4 Exclusive Economic Zone (EEZ) 30
II.2.7 Continental Shelf 31
II.2.6 High Seas 32
II.3 Technical Aspects in Maritime Boundary Delimitation 32
II.3.1 Islands 32
II.3.2 Reefs 33
II.3.3 Low-Tide Elevations (LTEs) 33
II.3.4 Baselines 33
II.4 Coastline Areas 36
II.4.1 Satellite-Derived Coastlines 37
II.4.2 Tidally Corrected Coastlines 38
II.5 Remote Sensing 38
II.5.1 Optical Remote Sensing 39
II.5.2 Image Preprocessing 41
II.5.2.1 Radiometric Correction 41

II.5.2.2 Cloud Masking 42
II.5.2.3 Geometric Correction 43
II.5.2.4 Image Mosaicking 44
II.5.3 Water Indices 44
II.5.4. Accuracy Assessment 45
II.6 Datum 47
II.6.1 Vertical Datum 47
II.6.2 Finite Element Solution (FES) 2022 Global Tide Model 48
II.6.3 Horizontal Datum 49
II.7 Satellite Derived Shoreline Analysis 49
II.8 Tidal Datum Estimation and Vertical Correction Method. 50
I.8.1 Principal Tidal Datums 51
II.8.2 Harmonic Derivation of Tidal Datums from FES2022 51
CHAPTER III RESEARCH METHOD 54
III.1 Location of The Research 54
III.2 Materials and Equipments 55
III.2.1 Materials 55
III.2.2 Equipments and Software 56
III.3 Research Method 57
III.3.1 Basepoint Preparation from Legal Documents Clipping 58
III.3.2 Pre-processing and Quality Control 59
III.3.3 Satellite Image Acquisition and Tidal-Guided Scene Selection 62
III.3.4 Cloud Masking and MNDWI Composite Construction 63
III.3.5 Shoreline Extraction from Imagery 64
III.3.6 Tidal Datum Correction and Physical Displacement Modeling 66
III.3.7 Baseline Reconstruction 68
III.3.8 Statistical Analysis and Comparison with Official Baselines 69
III.3.9 Validation Against Official BIG Coastline 70
CHAPTER IV RESEARCH RESULTS 71
IV.1 Basepoint Dataset and Spatial Coverage 71
IV.1.1 Data Loading and Geometry Reconstruction 72
IV.1.2 Spatial Distribution 73
IV.2 Satellite Imagery Acquisition and Spectral Water Detection 73
IV.2.1 Imagery Coverage and Cloud-Masking Outcomes 74
IV.2.2 MNDWI Composite Quality and Spectral Separability 76
IV.2.2.1 Raw Scene Acquisition and RGB Composites 77
IV.2.2.2 MNDWI Derivation and Spectral Separability 79
IV.3 Shoreline Extraction and Shift Quantification 81
IV.3.1 MNDWI Isoline Vectorisation 81

IV.3.2 Shore-Normal Transect and distance_m Calculation 83
IV.4 Sea-Level Rise Correction and Adjusted Basepoint Estimation 84
IV.4.1 Sea-Level Rise Estimation per Basepoint 84
IV.4.2 Tidal Range Classification and Site-Specific Correction 86
IV.4.3 Displacement Correction of Imagery-Extracted Positions 87
IV.4.4 Cross-Epoch Shift Statistics and Spatial Pattern Analysis 90
IV.5 Baseline Reconstruction and Change Rates 91
IV.5.1 Baseline Geometry Reconstruction 91
IV.5.2 Baseline Change Rates Estimation 94
IV.5.3 Linear Change Profile and Per-Basepoint Rate Analysis 96
IV.6 Statsitic Summary and Validation 98
IV.6.1 Tidal Correction Validation and FES2022 Contribution 98
IV.6.2 Statistical Summary 99
IV.6.3 Validation with Field Data 101
IV.6.3.1 Primary Validation with Basepoints Results 102
IV.6.3.2 Supplementary ROI Validation using Java Island Coastal Transect 105
IV.6.3.3 Combined Validation and Accuracy Reporting 107
CHAPTER V CONCLUSION AND RECOMMENDATIONS 108
V.1 Conclusion 108
V.2 Recommendations 109
