UNIVERSITAS
GADJAH MADA
a synergistic hybrid ensemble model for predicting financial distress
MBEMBA BADJIE, Fitri Amalia, S.E., M.Sc., Ph.D.
Universitas Gadjah Mada, 2026 | Diunduh dari http://etd.repository.ugm.ac.id/

TABLE OF CONTENTS

Title Page.....i
Foreword.....ii
Table of contents.....iii
List of Tables.....vi
List of Figures.....vii
List of Abbreviations.....viii
Abstract.....ix

CHAPTER 1:INTRODUCTION.....1
1.1 Background.....1
1.2 Problem Statement.....3
1.3 Research Question.....4
1.4 Research Objective.....5
1.5 Scope of The Study.....5
1.6 Research Contribution.....6
CHAPTER 2:LITERATURE REVIEW AND THEORETICAL BACKGROUND.....7
2.1 Financial Distress.....7
2.2 Conventional Financial Distress Model.....10
2.3 Cross-National Applicability of Financial Distress Theory.....13
2.4 Artificial Intelligence and Machine Learning in Financial Prediction.....15
2.4.1 Ensemble Learning Methods in Financial Distress Prediction.....17
2.4.2 Random Forest (RF).....18
2.4.3 Extreme Gradient Boosting.....19
2.4.4 Artificial Neural Network (ANN) Multi-Layer Perceptron (MLP).....20
2.4.5 Synthetic Minority Over-sampling Technique (SMOTE) to handle Class Imbalance.....20
2.4.6 Financial features and macroeconomic influence on Corporate financial distress.....21
2.4.7 Institutional Context of the Retail and Manufacturing Sectors.....23
2.4.8 Adjustment for Exogenous Shock: The COVID-19 Pandemic.....26
2.5 Theoretical Background.....28
2.5.1 Critical evaluation of the Altman Z-Score model.....28
2.5.2 Ensemble Learning in Financial prediction.....30
2.5.3 Macro-Financial Linkage.....34
2.6 Hypothesis Development.....38
2.6.1 A Hybrid-Ensemble Model For Better Prediction.....38
2.6.2 Macroeconomic Influence on Financial Distress.....40
CHAPTER 3:RESEARCH METHODS.....42
3.1 Research Design.....42

UNIVERSITAS
GADJAH MADA
a synergistic hybrid ensemble model for predicting financial distress
MBEMBA BADJIE, Fitri Amalia, S.E., M.Sc., Ph.D.
Universitas Gadjah Mada, 2026 | Diunduh dari http://etd.repository.ugm.ac.id/

3.1.1 Model Architecture 43
3.1.2 Feature selection 44
3.1.3 Hyperparameter setting 45
3.1.4 Variables 46
3.1.5 Data Collection Technique 50
3.1.6 Identification and Classification of Financial Distress 52
3.2 Modelling Methods 53
3.2.1 Random Forest (RF) 53
3.2.2 Extreme Gradient Boosting (XGBoost) 55
3.2.3 Artificial Neural Network (ANN) Multi-Layer Perceptron (MLP) 57
3.2.4 Temporal Split for Exogenous Shocks 59
3.3 Model development 60
3.4 Validity 62
3.4.1 Cross-validation 62
3.4.2 Confusion Matrix 63
3.5 Reliability 64
3.6 Model Accuracy 65
3.7 Comparative Framework 66
3.8 Country-Specific Probability Thresholds 67
CHAPTER 4: DATA ANALYSIS, MODEL EVALUATION AND MODEL WORKFLOW 70
4.1 Descriptive Statistics Analysis 70
4.1.1 Dataset Overview 70
4.1.2 Univariate Statistics 71
4.1.3 Correlation Matrix 74
4.1.4 SHAP Feature Importance Analysis 76
4.2 Overall Model Performance 79
4.2.1 The Trade-off between Precision and Recall in Classification Behavior 82
4.2.2 Temporal Generalizability and Cross-Validation Performance 84
4.2.3 Analysis of Misclassified Cases 85
4.3 Macroeconomic Variable Impact 88
4.4 Hypothesis Testing 90
4.4.1 H1: Hybrid-Ensemble model superiority over individual base model. 90
4.4.2 H2: Inclusion of macroeconomic variables enhances the performance of the hybrid-ensemble financial distress model. 93
4.5 Discussion 94
CHAPTER 5:CONCLUSION, IMPLICATIONS, AND CONSTRAINTS 97
5.1 Conclusion 97
