ABSTRACT		xi
INTISARI		xii
CHAPTER 1	INTRODUCTION	1
	I.1 Background	1
	I.2 Research Aims	2
	I.3 Research Benefits	2
CHAPTER II	LITERATURE REVIEW, HYPOTHESIS FORMULATION AND RESEARCH DESIGN	3
	II.1 Literature Review	3
	II.1.1 The properties and utilization of silver metal	3
	II.1.2 Removal methods of Ag(I) ion	3
	II.1.3 Volcanic ash	5
	II.1.4 Activation process for adsorbent	6
	II.1.5 Adsorption kinetics	7
	II. 2 Hypothesis Formulation and Research Design	10
	II.2.1 Hypothesis formulation 1	10
	II.2.2 Hypothesis formulation 2	10
	II.2.3 Hypothesis formulation 3	11
	II. 3 Research Design	11
CHAPTER III	RESEARCH METHOD	13
	III.1 Materials	13
	III.2 Instruments	13
	III.3 Procedures	13
	III.3.1 The preparation of stock solution	13
	III.3.2 The adsorption of Ag(I) ion in the solution by volcanic ash	13
CHAPTER IV	RESULT AND DISCUSSION	16
	IV.1 Characterization of Volcanic Ash using X-Ray Diffraction (XRD)	16
	IV.2 The Washing of Volcanic Ash with Hydrochloric Acid	18

	IV.2.1	Characterization using X-Ray Diffraction (XRD)	18
	IV.2.2	Characterization of volcanic ash morphology using Scanning Electron Microscopy (SEM)	19
	IV.2.3	Characterization of volcanic ash morphology using Transmission Electron Microscopy (TEM)	21
	IV.3	The Effect of Contact Time against Ag(I) Adsorption in the Solution	22
	IV.4	Adsorption kinetics	24
	IV.5	The Effect of pH on Ag(I) Adsorption in the Solution	26
CHAPTER V	CONCLUSIONS AND SUGGESTIONS		27
	V.1	Conclusions	27
	V.2	Suggestions	27
REFERENCES			28
APPENDICES			33

LIST OF FIGURES

Figure II.1	Acid activation process	10
Figure IV.1	Diffractiongram of the volcanic ash	16
Figure IV.2	Diffractiongram of volcanic ash (a) unwashed volcanic ash (b) washing with 1.2 M HCl (c) Ag(I) ion adsorption using washed volcanic ash by 1.2 M HCl	19
Figure IV.3	SEM images of (a) surface of volcanic ash before washing (b) surface of volcanic ash after washing with 1.2 M HCl and (c) surface of washed volcanic ash after Ag(I) ion adsorption. Size of images are 25 μm x 25 μm for (a) and (b) and 40 μm x 40 μm for (c)	20
Figure IV.4	TEM images of (a) crystal morphology of volcanic ash before washing (b) crystal morphology of volcanic ash after washing using 1.2 M HCl and (c) crystal morphology of the washed volcanic ash after Ag(I) ion adsorption. Size of images are 350 nm x 350 nm	21
Figure IV.5	TEM images of Ag(I) ion that adsorbed and attached on the volcanic ash	22
Figure IV.6	The effect of contact time toward adsorption of Ag(I) ion	23
Figure IV.7	Electrostatic interaction between Ag(I) ion and SiO ₂ during adsorption process	23
Figure IV.8	Kinetic model a) Lagergren b) McKay & Ho	24
Figure IV.9	The effect of pH toward adsorption of Ag(I) ion	26

LIST OF TABLES

Table IV.1	Comparison of 2θ values of the unwashed volcanic ash from JCPDS data	17
Table IV.2	Ag(I) ion particle on the surface of adsorbent	22
Table IV.3	Kinetic data of Ag(I) ion adsorption by volcanic ash	25

LIST OF APPENDICES

Appendix 1	The effect of contact time on adsorption of Ag(I) in solution by volcanic ash	33
Appendix 2	The effect of pH on adsorption of Ag(I) in solution by volcanic ash	34
Appendix 3	Kinetic Adsorption of Pseudo-First Order Reaction	35
Appendix 4	Kinetic Adsorption of Pseudo-Second Order Reaction	36
Appendix 5	Characterization of adsorbent before washing using SEM	37
Appendix 6	Characterization of adsorbent after washing using SEM	37
Appendix 7	Characterization of adsorbent after adsorption using SEM	38
Appendix 8	Characterization of adsorbent before washing using TEM	39
Appendix 9	Characterization of adsorbent after washing using TEM	39
Appendix 10	Characterization of adsorbent after adsorption using TEM	40
Appendix 11	Characterization of adsorbent before washing using XRD	41
Appendix 12	Characterization of adsorbent after washing using XRD	42
Appendix 13	Characterization of adsorbent after adsorption using XRD	43
Appendix 14	Standard Data of JCPDS of Quartz (SiO_2)	44
Appendix 15	Standard Data of JCPDS of Feldspar (AlSi_3O_8)	45
Appendix 16	Standard Data of JCPDS of Mullite ($3\text{Al}_2\text{O}_3 \cdot 2\text{SiO}_2$)	46
