

LIST OF FIGURES

Figure	Page
1.1 PWR emergency cooling system arrangement [7]	1
1.2 PWR primary system arrangement [20].....	3
1.3 Reflux condenser mode in primary circuit [25].....	4
1.4 A CANDU primary heat transport system [20].....	5
2.1 Relationship between liquid flow rate and air flow rate at CCFL [32].....	8
2.2 The large spread in the flooding data in many investigations [19].....	13
2.3 Graphical solution to the drift flux problem [17]	15
2.4 Regimes for vertical counter-current flow limitation [8].....	19
3.1 Data range for experiment and simulation model in CCFL[6].....	23
4.1 HAAKE falling ball viscometer	29
4.2 LAUDA tensiometer TD1	30
4.3 Scheme of experimental apparatus	31
4.4 Assembled LEDs	32
4.5 Electronic illuminating control unit	32
4.6 Fluid inlet geometry	33
4.7 Acrylic test section.....	35
4.8 Calm section	35
4.9 Feeder pump	36
4.10 Digital thermometer	37
4.11 Signet flow transmitter	38
4.12 Liquid tank.....	39
4.13 Electronic high speed camera optic	40
4.14 The chart of visual data process.....	41
5.1 Examples of interfacial behavior of smooth stratified flow	47
5.2 Examples of interfacial behavior of wavy stratified flow	48
5.3 Examples of interfacial behavior of churn flow	49
5.4 Relationship between the superficial liquid and air velocities.	53
5.5 Effect of pipe inclination angle on flooding.....	54
5.6 A typical sequence of frames showing the liquid film behavior near the CCFL of W1.....	56

	Page
5.7 A typical sequence of frames showing the liquid film behavior near the CCFL of V_2	56
5.8 A typical sequence of frames showing the liquid film behavior near the CCFL of S_2	57
5.9 The effect of liquid surface tension on the flooding	57
5.10 The effect of liquid viscosity on flooding	58
5.11 Relationship between flooding and deflooding experimental data.....	60
5.12 Air- water flooding experiments.....	61
5.13 A comparison of air-various liquid experimental data.....	62

LIST OF TABLES

Table	Page
2.1 Fluids properties dependence in CCFL	20
3.1 Important parameters in scaling analysis of the CCFL phenomenon	22
3.2 Properties of butanol and glycerol	24
3.3 Glycerin aqua solution properties	25
3.4 Butanol aqua solution properties	25
3.5 Experimental air flow rate	26
3.6 Experimental liquid flow rates.....	26
4.1 The properties of ball testing unit	29
4.2 Experimental measurement and devices	37
4.3 Calibrated measurement device	43
A1-10 Appendix	67
