Evaluation of a Plant Fisiology Monitoring System Performance Based on Visible-Near Infrared Spectroscopy in a Controlled Environment
Arifa Haryani, Andri Prima Nugroho, S.T.P., M.Sc., Ph.D. ; Prof. Dr. Nazmi Mat Nawi
Universitas Gadjah Mada, 2026 | Diunduh dari http://etd.repository.ugm.ac.id/

TABLE OF CONTENTS

STATEMENT OF ORIGINALITY iv
TABLE OF CONTENTS ix
LIST OF FIGURES xi
CHAPTER I INTRODUCTION 2
1.1 Background 2
1.2 Problem Formulation 6
1.3 Problem Definition 7
1.4 Objectives 7
1.5 Research Benefits 7
CHAPTER 2. LITERATURE REVIEW 9
2.1 Precision Agriculture 9
2.2 Controlled Environment 10
2.3 Vis-Nir Sensor Technology 11
2.4 Plant Physiology 15
2.5 Spectroscopic Sensors 17
2.6.1 Spectroscopic Measurement 19
2.6.2 Application of Vegetation Monitoring in Agriculture 20
2.7 Performance Evaluastion System 22
CHAPTER 3. RESEARCH METHODS 24
3.1 Framework 24
3.2 Research Location and Time 26
3.2.1. Research Location 26
3.2.2. Research Timeline 26
3.3 Research Tools and Materials 26
3.3.1 Research Instruments 26
3.3 Research Procedure 49
3.4 Calibration Analysis of the Spectroscopy-Based Monitoring System 51
3.4.1 Linear Regression Test 51
3.4.2 Root Mean Square Error (RMSE) 53

3.4 Reflectance 54
3.5 Plant and Cultivation Environment Conditioning 55
3.6 System Implementation, Data Validation, and Evaluation 56
3.7 Coefficient of Variation 58
CHAPTER IV RESULTS AND DISCUSSION 59
4.1 Performance of the Plant physiologyMonitoring System Using a Vis–NIR Spectroscopy Sensor 59
4.2 Validation of Plant Physiological Data Using the AS7265x Sensor 63
4.3 Evaluation of the Monitoring System Performance 77
4.4 Statistical Performance of the Model Based on the Coefficient of Variation (CV) 80
4.5. Comparison of Chlorophyll Values under Normal and Stress Nutrient Treatments 82
4.6 Comparison of Plant Weight at Harvest under 1200 ppm and 600 ppm Nutrient Treatments 85
CHAPTER V CONCLUSIONS AND RECOMMENDATIONS 87
5.1 Conclusions 87
5.2 Recommendations 89
REFERENCES 91
APPENDIX 105
