

TABLE OF CONTENTS

TITLE PAGE.....	i
APPROVAL PAGE	ii
DECLARATION.....	iii
LIST OF TABLES.....	viii
LIST OF FIGURES.....	ix
LIST OF APPENDICES	x
ABSTRACT.....	xi
INTISARI.....	xii
CHAPTER I	1
1.1 Research Backgorund	1
1.2 Problem Statement.....	5
1.3 Research Objectives	5
1.4 Research Significance.....	5
CHAPTER II.....	6
2.1 Lignocellulose as a Renewable Substrate.....	6
2.2 Enzymatic Degradation of Lignocellulose	9
2.3 <i>Trichoderma</i> as a Cellulolytic Fungus.....	12
2.4 Submerged Fermentation for Enzyme Production	14
2.5 Secretome Analysis.....	16
2.6 Hypothesis	18
CHAPTER III	19
3.1 Research Location and Period	19
3.2 Materials	19
3.3 Instruments and Equipment	22
3.4 Experimental Procedure	23
3.4.1 Microorganisms and Culture Conditions	23
3.4.2 Preparation of Lignocellulosic Materials.....	24
3.4.3 Qualitative Screening of Enzymatic Activity	24
3.4.4 Submerged Fermentation for Enzyme Production.....	25
3.4.5 Quantitative enzyme activity assays	26
3.4.6 Well Diffusion Assay with Congo Red	27
3.4.7 Molecular Identification of Isolate BT4 via ITS Sequencing.....	28

3.5 Analytical Method	29
3.5.1 Native-PAGE	29
3.5.2 Zymogram.....	30
3.5.3 Proteomic Profiling.....	31
CHAPTER IV	34
4.1 Isolation of <i>Trichoderma</i> Strains from Lignocellulosic Biomass.....	34
4.2 Qualitative Screening of Cellulase Activity	36
4.3 Quantitative Screening of Cellulase Activity	40
4.4 Congo Red-CMC Plate Assay	43
4.5 Native-PAGE and Zymogram Analysis	45
4.6 Secretome Profiling of BT4 by LC-MS/MS.....	49
4.6.6 Limitations	56
CHAPTER V.....	58
5.1 Conclusion.....	58
5.2 Suggestions.....	59
REFERENCES.....	61
APPENDICES	70
