

## TABLE OF CONTENTS

COVER PAGE.....	i
DECLARATION .....	iii
PREFACE .....	iv
TABLE OF CONTENTS .....	v
LIST OF TABLES .....	ix
LIST OF FIGURES .....	x
ABSTRACT.....	xi
CHAPTER 1 INTRODUCTION .....	1
1.1 Background .....	1
1.2 Research Questions .....	2
1.3 Aims and Objectives .....	2
1.4 Limitations.....	2
1.5 Benefits.....	3
1.6 Originality of Research .....	3
CHAPTER 2 LITERATURE REVIEWS .....	4
2.1 Bridge .....	4
2.1.1 Overpass .....	4
2.1.2 Bridge structure .....	4
2.1.3 Bridge types.....	5
2.2 Steel Box Girder.....	6
2.3 Composite Structure .....	6
2.3.1 Basic concept of composite action .....	7
2.3.2 Composite steel-concrete deck system.....	8
CHAPTER 3 THEORITICAL FRAMEWORK .....	9
3.1 Deck Section Design .....	9
3.1.1 Dimension of steel deck .....	9
3.1.2 Construction loads on steel deck.....	9
3.1.3 Flexural analysis of composite plate .....	11

3.2 Composite Deck Deflection .....	12
3.3 Girder Section Proportioning .....	13
3.3.1 Girder web depth.....	13
3.3.2 Cross section properties .....	14
3.4 Loads and Loads Combination.....	16
3.4.1 Dead loads .....	16
3.4.2 Live loads .....	17
3.4.3 Wind loads.....	19
3.4.4. Earthquake load (EQ).....	19
3.4.5 Construction live load .....	20
3.4.6 Fatigue load .....	20
3.4.7 Loads combination .....	20
3.5 Section Analysis .....	20
3.5.1 Elastic section properties.....	20
3.5.2 Plastic section properties .....	21
3.6 AASHTO LRFD Steel Box Design.....	23
3.6.1 Constructibility (positive moment) .....	23
3.6.2 Service limit state (positive moment).....	27
3.6.3 Fatigue and fracture limit state.....	28
3.6.4 Strength limit state (positive moment) .....	30
3.6.5 Constructibility (negative moment) .....	32
3.6.6 Service limit state (negative moment).....	34
3.6.7 Strength limit state (negative moment) .....	34
3.7 Shear Connector Design.....	35
3.8 Bracing .....	36
CHAPTER 4 METHODS .....	38
4.1 Bridge Data.....	38
4.2 Design Process .....	38
4.3 Modeling on CSiBridge.....	41
CHAPTER 5 RESULT AND DISCUSSION .....	44
5.1 Steel Deck Calculations.....	44

5.2 Girder Section Proportioning .....	48
5.2.1 Girder web depth .....	48
5.2.2 Cross section properties .....	48
5.3 Loads and Loads Combination.....	49
5.3.1 Dead loads .....	49
5.3.2 Live loads .....	50
5.3.3 Wind loads.....	51
5.3.4. Earthquake load (EQ).....	51
5.3.5 Construction live load .....	52
5.3.6 Fatigue load .....	52
5.3.7 Loads combination .....	52
5.4 Section Analysis .....	52
5.4.1 Elastic section properties.....	52
5.4.2 Plastic section properties .....	55
5.5 AASHTO LRFD Steel Box Design.....	56
5.5.1 Constructibility (positive moment) .....	56
5.5.2 Service limit state (positive moment).....	60
5.5.3 Fatigue and fracture limit state.....	61
5.5.4 Strength limit state (positive moment) .....	62
5.5.5 Constructibility (negative moment) .....	64
5.5.6 Service limit state (negative moment).....	66
5.5.7 Strength limit state (negative moment) .....	66
5.6 Shear Connector Design.....	68
5.7 Bracing .....	69
5.8 Result Summary .....	70
5.8.1 Dimensions of steel box girder.....	70
5.8.2 Analysis of box girder .....	71
5.9 Weight Ratio of Redesigned to Existing Girder.....	73
CHAPTER 6 CONCLUSION AND RECOMMENDATION.....	76
6.1 Conclusion.....	76
6.2 Recommendation.....	76

BIBLIOGRAPHY .....	77
APPENDICES .....	78
Appendix 1 Layout of Balikpapan-Samarinda Toll Road STA 66+078 .....	78
Appendix 2 Maximum Moment and Shear from CSiBridge .....	79
Appendix 3 Cross Section of Bridge .....	79
Appendix 4 Shear Connector Detail .....	81
