INTISARI x
ABSTRACT xi
CHAPTER I INTRODUCTION 1
1.1 Research Background 1
1.2 Research Problem 4
1.3 Research Scope and Limitations 4
1.4 Research Objective 5
1.5 Research Advantage 6
CHAPTER II LITERATURE REVIEW 7
CHAPTER III BASIC THEORIES 15
3.1 CubeSat Architecture 15
3.2 Telemetry, Tracking, and Command 15
3.3 LoRa Communication Basics 16
3.4 Packet Framing and Error Detection in TTC 17
3.5 Data Serialization Formats 17
3.6 Link Reliability and Latency 18
3.7 Flask as Ground Station Backend 18
3.8 WebSocket Protocol 19
3.9 React for Web-based Dashboard 19
3.10 Educational Application of CubeSat Kits 19
3.11 Onboard State Estimation 21
CHAPTER IV RESEARCH METHOD 22
4.1 Research Overview 22
4.2 System Engineering Approach 22
4.3 System Analysis 23

Design and Implementation of LoRa-Based Telemetry, Tracking, and Command (TTC) Subsystem for 1U
CubeSat Prototype as an Educational Tool
Akhtar Fawwaz Hannan, Dr. Agfianto Eko Putra, M.Si.
Universitas Gadjah Mada, 2026 | Diunduh dari http://etd.repository.ugm.ac.id/

4.4 Research Tools and Materials 26
4.5 Research Workflow 29
4.6 System Design 30
4.6.1 Onboard firmware overview 31
4.6.2 Telemetry and command packet design 35
4.6.3 Communication protocol integrity and error handling 42
4.6.4 Ground station software design 45
4.6.5 Onboard attitude and altitude estimation 45
4.6.6 Tracking data path design 48
4.6.7 Hardware connections and power 49
4.7 Implementation of Research Methods 52
4.8 System Testing and Validation 53
4.8.1 Range test measurement procedure 59
CHAPTER V RESULTS AND IMPLEMENTATION 61
5.1 Flask Ground Station Backend Implementation 61
5.1.1 Backend initialization and configuration 63
5.1.2 Telemetry parsing and CRC-16 validation 64
5.1.3 WebSocket streaming to dashboard 66
5.2 React Dashboard Implementation 67
5.2.1 Real-Time telemetry visualization 67
5.2.2 Command uplink interface 68
5.3 Onboard TTC Firmware Implementation 70
5.3.1 Telemetry acquisition and packet encoding 70
5.3.2 LoRa transmission and half-duplex timing 71
5.3.3 Command reception and execution 72
5.3.4 Component-level checks 73
5.4 Validation Results 74
5.5 LoRa Link Range Characterization 79
5.5.1 Repeated 100-packet range tests 82
5.6 Measured Telemetry Cadence 84
5.7 Command Uplink Verification 89
5.8 Tracking Verification: GNSS Position Acquisition and Sensor Fusion 95

5.9 Link Failure Analysis at 50 m and 100 m 99
5.10 Hands-on Guide: Assembling and Operating the TTC Subsystem 105
5.10.1 What you need..... 106
5.10.2 Flashing the two roles 106
5.10.3 First contact: verifying the downlink without any software 107
5.10.4 Running the ground station 107
5.10.5 Sending your first command 108
5.10.6 Common problems 109
CHAPTER VI CONCLUSION..... 110
6.1 Conclusion 110
6.2 Limitations 111
6.3 Requirement Revision Rationale 115
6.4 Recommendations for Further Work 118
BIBLIOGRAPHY 120
APPENDIX A RANGE TEST RAW DATA 124
A.1 Provenance Note 124
A.2 10 m Run — Raw Log (10m data.csv) 124
A.3 50 m Run — Raw Log (50m data.csv) 125
A.4 Session Log Format 126
A.5 Session Log Excerpt..... 127
APPENDIX B DATA AND CODE AVAILABILITY 128
B.1 Repository 128
B.2 Timestamp definitions 128
B.3 Experiment timeline 128
B.4 Hardware photograph 130
