Rawat inap sehat merupakan salah satu layanan kesehatan hewan yang tersedia di Lab Klinik “Klinik Hewan Jogja” Yogyakarta. Tujuan penulisan tugas akhir ini adalah mengetahui manajemen perawatan pasien rawat inap sehat di Lab Klinik “Klinik Hewan Jogja” Yogyakarta periode 1 – 30 September 2017. Materi yang digunakan untuk penulisan Tugas Akhir ini adalah pasien anjing dan kucing rawat inap sehat di Lab Klinik “Klinik Hewan Jogja” selama periode 1 – 30 September 2017. Pengambilan data dilakukan dengan observasi, interview dan praktik langsung dalam perawatan pasien rawat inap sehat, serta metode pencatatan dengan mengambil data dari *recording* rawat inap sehat selama periode Praktik Kerja Lapangan. Sebanyak 18 anjing dan 62 kucing tercatat selama periode 1 – 30 September 2017. Manajemen perawatan pasien rawat inap sehat meliputi pembersihan kandang dan alas kandang dilakukan dua kali sehari tanpa desinfektan, pemberian pakan dan minum dilakukan dua kali sehari dan air minum harus selalu tersedia. Berdasarkan hasil dan pembahasan dapat disimpulkan bahwa manajemen perawatan pasien anjing dan kucing rawat inap sehat di Lab Klinik “Klinik Hewan Jogja” Yogyakarta telah berjalan baik namun penempatan pasien beda spesies masih dalam satu ruang dan pembersihan kandang tidak menggunakan desinfektan. Penempatan pasien beda spesies sebaiknya tidak dalam satu ruangan dan pembersihan kandang sebaiknya menggunakan desinfektan.

Kata kunci: rawat inap sehat, perawatan, anjing, kucing, Lab Klinik “Klinik Hewan Jogja” Yogyakarta.

ABSTRACT

THE CARING OF HEALTHY BOARDING PATIENTS AT LAB KLINIK “KLINIK HEWAN JOGJA” YOGYAKARTA
