INTISARI

Perawatan pasien pascaoperasi merupakan salah satu cara penanganan pasien untuk mendukung keberhasilan proses operasi dan untuk mengembalikan kondisi normal pasien. Tujuan penulisan Tugas Akhir ini adalah untuk mengetahui manajemen perawatan pasien pascaoperasi di Pet Friends Animal Hospital Sriracha, Thailand. Pengambilan data dilakukan dengan observasi, wawancara dan praktek langsung pada pasien periode 19 November sampai dengan 1 Desember 2017. Perawatan dilakukan pada pasien pascaoperasi kastrasi, ovariohisterektomi dan *sectio caesarea*. Manajemen perawatan pasien pascaoperasi di Pet Friends Animal Hospital Sriracha, Thailand yaitu pemindahan pasien ke ruang rawat inap, pemberian pakan dan air minum, *monitoring* luka berupa pergantian perban dan pelepasan jahitan, *monitoring* pasien berupa nafsu makan, temperatur tubuh, intensitas *vomit*, warna urin dan *fecal score* serta pemberian antibiotik. Manajemen perawatan pasien pascaoperasi di Pet Friends Animal Hospital Sriracha, Thailand apabila dibandingkan dengan Standar Operasional Prosedur (SOP) masih ada beberapa hal yang perlu diperbaiki, yaitu *monitoring* terhadap pasien belum sesuai SOP karena tidak dilakukan pengukuran temperatur tubuh terhadap pasien, pasien pascaoperasi *sectio caesarea* langsung dibawa pulang oleh pemilik sehingga tidak dilakukan perawatan pascaoperasi di Pet Friends Animal Hospital Sriracha, Thailand.

Kata kunci: *perawatan pascaoperasi, kastrasi, ovariohisterektomi, sectio caesarea.*

POST OPERATIVE PATIENT MANAGEMENT AT PET FRIENDS ANIMAL HOSPITAL SRIRACHA, THAILAND

ABSTRACT

Post operative patient care is one of the intervention on patients to support the surgery process and to restore the patient's normal condition. The purpose of this final project is to know post operative patient management at Pet Friends Animal Hospital Sriracha, Thailand. Data collection was done by observation, interviewing and practicing directly on patient period of 19 November until 1 December 2017. Treatment is performed on pot operation castration patients, ovariohysterectomy and *sectio caesarea*. Post operative patient care management at Pet Friends Animal Hospital Sriracha, Thailand is a transfer to the inpatient room, feeding and drinking water, wound monitoring in the form of bandage change and discharge suture, patient monitoring in the form of appetite, body temperature, the intensity of vomiting, urine color, fecal score and antibiotics. Post operative patient care management at Pet Friends Animal Hospital Sriracha, Thailand when compared with Standard Operational Procedures (SOP) there were still somethings that need to be improved, that was monitoring of patient not according to SOP because body temperature measurement was did not do to patient, post operative patient *sectio caesarea* direct take home by owner so did not do post operative care in Pet Friends Animal Hospital Sriracha, Thailand.

Kata kunci: *caring post operative, castration, ovariohysterectomy, sectio caesarea.*
