

TABLE OF CONTENT

Cover	I
Approval Sheet	iii
Declaration of Authenticity	iv
Preface	v
Table of Contents	vii
List of Tables	ix
List of Figures	x
Abstrak	xii
Abstract	xiii
CHAPTER I Introduction	1
1.1. Background	1
1.2. Objectives	3
1.3. Hypothesis	4
1.4. Advantages	4
CHAPTER II LITERATURE REVIEW	5
2.1. Instant Coffee 3in1	5
2.2. Packaging	6
2.2.1. Aluminum Foil	8
2.2.2. Metalized Film	11
2.3. Shelf life	12
2.4. Water Activity	14
2.5. Moisture Sorption Isotherm	15
2.6. Measurement of Sorption Isotherm	17
2.7. Mathematical Models of Sorption Isotherms	18
2.7.1. Langmuir Model	19
2.7.2. Guggenheim Anderson-de Boer (GAB) Model	19
2.7.3. Bruneaur Emmet Teller (BET) Model	20
2.7.4. Oswin Model	22
2.7.5. Halsey Model	23
2.7.6. Iglesias-Chirife Model	24
CHAPTER III MATERIAL AND METHOD	25
3.1. Material	25

3.2. Methods	27
3.2.1. Preparation Sample	27
3.2.2. Determination Moisture Sorption Isotherm of Instant Coffee 3in1	27
3.2.3. Determination of Water Vapour Permeability Coefficient	28
3.2.4. Determination of Initial Moisture Content	28
3.2.5. Determination of Critical Moisture Content	28
3.2.6. Equilibrium Moisture Content	29
3.2.7. Determination Shelf life of Instant Coffe 3in1	29
CHAPTER IV RESULT AND DISCCUSION	31
4.1. Mositure Sorption Isotherm of Instant Coffee 3in1	31
4.2. Water Vapour Permeability Coefficient of Packaging Materials (Metalized and Aluminum Foil)	33
4.3. Initial, Critical, and Equilibrium Moisture Content	33
4.4. Shelf life of Instant Cofffee 3in1	34
CHAPTER V CONCLUSION AND SUGGESTION	36
5.1. CONCLUSION	36
5.2. SUGGESTION	36
REFERENCE	37
APPENDIX	41
