HALAMAN PENGESAHAN	ii
PERNYATAAN	iv
PREFACE	iv
CONTENTS	vi
LIST OF TABLES	ix
LIST OF FIGURES	x
NOMENCLATURE	xii
ABSTRACT	xiv
<i>INTISARI</i>	xv
I INTRODUCTION	1
1.1 Research Motivation	1
1.2 Originality	5
1.3 Problem Statement	6
1.4 Research Constraints	7
1.5 Research Objective	7
1.6 Research Benefit	7

1.7	Organization	8
II	ROTATION IN SO(3) GROUP	9
2.1	Rigid Body	9
2.2	Orthogonal and Rotation Matrices	10
2.3	Rigid Body Rotation in SO(3)	11
III	SYSTEM DYNAMICS AND MODELING	18
3.1	Quadrotor System Model	18
3.2	Payload Model	24
IV	PROPOSED PROPORTIONAL-DERIVATIVE CONTROL	28
4.1	Lyapunov Stability	28
4.2	Design of PD control Algorithm	29
V	NUMERICAL SIMULATION AND ANALYSIS	37
5.1	First Scenario: Nominal Condition	38
5.2	Second Scenario: Under Inertia Perturbation	42
5.3	Third Scenario: Varying Initial Conditions	47
5.4	Fourth Scenario: Time-Varying Inertia Perturbation	51
5.5	Fifth Scenario: Transporting Under Input Saturation	55
VI	CONCLUSIONS AND FUTURE WORKS	58
	REFERENCES	62

APPENDIX	63
1 Mathematical Group	63
2 Euler Angles Singularity	63
3 Drawback of Unit Quaternions	65
4 Orthogonal Matrix	66
5 Proof of Lyapunov Stability	68
6 PD Error Term	71
7 Bernoulli Numbers	71
8 Proof of Bound on Cross Term	71
9 Definite Functions	73
10 Definite Matrices	73
11 Positive Definiteness of \mathbf{P}_ε and \mathbf{Q}_ε	74
