Page of Title.....	ii
Page of Validation.....	iii
Page of Approval	iv
Declaration.....	v
Foreword.....	vii
Table of Contents.....	viii
List of Tables	xi
List of Figures	xii
Abstract.....	xiii
Publications.....	xiv
Chapter 1 Introduction	1
1.1 Background	1
1.2 Problem Statement	5
1.3 Research Objectives	6
1.4 Research Scope	7
1.5 Contribution	8
<i>Assistive Technology for Personalised Recommender</i>	8
<i>Assistive Technology for Reflexive Care</i>	8
1.6 Thesis Structure.....	9
Chapter 2 Literature Review	11
2.1 Pervasive Assistive Technologies.....	11
2.1.1 Previous Research on Assistive Technology	12
2.1.2 Acceptance and Personalisation of the Technology	14
2.2 Recommender Systems.....	21
<i>Content-based Recommendation Systems</i>	22
<i>Collaborative Filtering (CF) Recommendation Systems</i>	24
<i>Knowledge-based Recommendation Systems</i>	26
<i>Hybrid Recommendation Systems</i>	27
<i>Context-Aware Recommendation Systems</i>	27
2.2.1 Previous Research on Recommender Systems	28
2.3 Reflexive System	30
2.3.1 Previous Research on Existing Alert System.....	32
2.3.2 Previous Research on Reflexive System.....	35

2.3.3 Anomaly Detection	36
2.4 The Need of Pervasive Assistive Technology	38
2.5 The Need of Recommender System	39
2.6 The Need of Reflexive System	41
2.7 Justification of Research	42
2.8 Concluding Remarks.....	43
Chapter 3 Method	44
3.1 Materials	45
3.2 Research Method	45
3.3 Data Collection	52
3.4 Proposed Design	53
3.5.1 Training Data Preprocessing.....	56
3.5.2 Training Data Processing.....	57
3.5.3 Testing Data Processing.....	57
3.5.4 Personalised Recommender	58
3.5.5 Reflexive System	61
3.6 Performance Evaluation Method	63
Chapter 4 Personalised Recommender	64
4.1 Feature Selection.....	64
4.2 Providing Recommendation for Conditioning System	66
4.2.1 Recommender Module.....	68
4.2.2 Adaptive Conditioning Module	72
4.3 Performance Evaluation.....	79
4.4 Comparison with Other Approaches.....	80
4.4 Concluding Remarks.....	81
Chapter 5 Reflexive System.....	82
5.1 Principles of Reflexive.....	82
5.2 Autonomic Reflexive of Vital Signs Changes	83
5.3 Parameter of Reflexive System.....	84
5.4 Generating Reflexive through Anomaly Detection	86
5.4.1 Isolation Forest.....	87
5.4.2 Comparing Isolation Forest with Statistical Methods.....	89
5.4.3 Numerical Result	90
5.5 Performance Evaluation.....	92
5.6 Comparison with Other Reflexive Approaches	94
Chapter 6 Conclusion.....	96
6.1 Summary of the Thesis	96

<i>Outcomes</i>	96
6.2 Contribution of the Thesis	98
<i>Assistive Technology for Personalised Recommender</i>	98
<i>Assistive Technology for Reflexive Care</i>	99
6.3 Limitation and Further Method Improvement	100
Appendix 1. Ethical Clearance	115
Appendix 2. Performance Evaluation of Recommender System using Random Forest	116
Appendix 3. Anomaly Detection on Each Class.....	124

List of Tables

2.1 State of the art pervasive assistive technology and personalisation	18
2.2 Previous research on personalised recommender system	28
4.1 Feature selection using Weka	65
5.1 Confusion matrix on an elderly person's vital signs	93
5.2 Classification report on Isolation Forest	93
5.3 Isolation Forest Applied on International Outlier Detection Datasets (ODDS)	94

List of Figures

3.1 Experimental setup	45
3.2 Research method	46
3.3 Smartphone and environmental setting using Arduino	48
3.4 Home controller using smartphone	48
3.5 Smartwatch on an elderly person	48
3.6 Health assessment by geriatric on respondent #2	49
3.7 Heart rate measurement at hospital	49
3.8 Medical record of respondent #2	49
3.9 Health assessment result and medical reference of respondent #2	49
3.10 Network diagram to collect data	53
3.11 State chart diagram of proposed design	55
3.14 Deployment diagram of adaptive conditioning system	60
3.15 Deployment diagram of reflexive system	62
4.1 Pattern-based learning of personalised recommender	68
4.2 Training Data for recommender system using random forest	69
4.3 Simulation of proposed design	78
4.4 Performance evaluation of recommender system using random forest	79
4.5 Number of error prediction for each fold	80
5.1 Proposed method of anomaly detection	86
5.2 Comparison of anomaly detection for a combined speed and acceleration	91
5.3 Anomaly detection for each speed and each acceleration for heart rate	91
5.4 Anomaly detection for each speed and each acceleration for skin temperature	92
