TITLE PAGE.....	i
APPROVAL SHEET	ii
STATEMENT.....	iii
ACKNOWLEDGEMENT	iv
TABLE OF CONTENT	vi
LIST OF TABLE	ix
LIST OF FIGURE	x
LIST OF ABBREVIATION.....	xi
ABSTRACT	xii
 CHAPTER 1 INTRODUCTION	 1
1.1. Research background	1
1.2.Problem formulations	2
1.2. Research purposes	3
1.3. Benefit of research	3
 CHAPTER 2 LITERATURE REVIEW	 4
2.1. Literature review	4
2.1.1. Emulsion.....	4
2.1.2. Stabilization of emulsion.....	4
2.1.3. Surfactant	10
2.1.4. Gelatin	11
2.1.5. Hydrolysis of gelatin	15

2.1.4. 2.1.6. Synthesis of N-acylamino acids	17
2.1.7. Gelatin as emulsifier	21
2.2. Hypothesis	23
CHAPTER III MATERIAL AND METHOD	24
3.1. Material and apparatus	24
3.2. Research design	23
3.3. Method	25
3.3.1. Hydrolysis with alcalase to get low molecular weight of gelatin.....	25
3.3.2. Preparation of N-hydroxysuccinimide ester of fatty acid as hydrophobic group	26
3.3.3. Covalent attachment of gelatin hydrolysate with N- hydroxysuccinimide ester of fatty acid	28
3.4. Analysis.....	29
3.4.1. Hydrolysis with alcalase to get low molecular weight of gelatin.....	29
3.4.2. Preparation of N-hydroxysuccinimide ester of fatty acid as hydrophobic group	30
3.4.3. Covalent attachment of gelatin hydrolysate with N- hydroxysuccinimide ester of fatty acid	31
3.5. Experimental design and stastitcal analysis	32
CHAPTER IV RESULT AND DISCUSSION.....	33
4.1. Hydrolysis with alcalase to get low molecular weight of gelatin	33
4.1.1. Yield of gelatin hydrolysate	33

4.1.2. Free amino group content of gelatin with different molecular weight	33
4.2. Preparation of N-hydroxysuccinimide ester of fatty acid as hydrophobic group	34
4.2.1. Yield of N-hydroxysuccinimide ester of fatty acid	34
4.2.2. Thin layer chromatography of N-hydroxysuccinimide ester of fatty acid	35
4.3. Covalent attachment of gelatin hydrolysate with N-hydroxysuccinimide ester of fatty acid	37
4.3.1. Free amino group content of gelatin hydrolysate acylated with N-hydroxysuccinimide esters of different fatty acids at various molar ratios	37
4.3.2. Emulsion properties of gelatin hydrolysate acylated with N-hydroxysuccinimide esters of different fatty acids at various molar ratios	39
CHAPTER V CONCLUSION AND FUTURE WORK	45
5.1 Conclusion.....	45
5.2 Future work	45
REFERENCES	47
APPENDIX	53

LIST OF TABLE

Table 2.1. Factors that contribute to the stabilization of emulsion	6
Table 2.2. Factors that affect the emulsion stability.....	7
Table 2.3. Amino acid composition of tilapia skin gelatin	12
Table 4.1. Yield of gelatin hydrolysate	33
Table 4.2. Free amino group content of gelatin with different molecular weight (gelatin concentration 1%)	34
Table 4.3. Yield of N-hydroxysuccinimide ester of fatty acid	35
Table 4.4. Free amino group content and degree of modification of gelatin hydrolysate acylated with N-hydroxysuccinimide esters of different fatty acids at various molar ratios	37
Table 4.5. Emulsion properties of gelatin hydrolysate acylated with N- hydroxysuccinimide esters of different fatty acids at various molar ratios	42

LIST OF FIGURE

Figure 2.1. Destabilization of emulsion.....	5
Figure 2.2. Structure of gelatin	13
Figure 2.3. Covalent attachment of gelatin with N-hydroxysuccinimide ester of fatty acid	15
Figure 2.4. Acid activation and aminolysis steps	18
Figure 2.5. Activation of carboxylic acids by carbodiimides.....	19
Figure 2.6. Control of racemization by N-hydroxysuccinimide.....	20
Figure 3.1. Research design	24
Figure 3.2. Flow chart of hydrolysis with alcalase to get low molecular weight of gelatin.....	26
Figure 3.3. Flow chart of Preparation of N-hydroxysuccinimide ester of fatty acid as hydrophobic group	27
Figure 3.4. Flow chart of covalent attachment of hydrolyzed gelatin with N-hydroxysuccinimide ester of fatty acid	29
Figure 4.1. Thin layer chromatogram on chromatoplate silica gel	36
Figure 4.2. Emulsion properties of gelatin hydrolysate modified with N-Hydroxysuccinimide esters of different fatty acids at various molar ratios	40
