### **LIST OF APPENDIX**

- Appendix 1: Chi-square goodness of fit test for sex of the victims
- Appendix 2: Chi-square goodness of fit test for age of the victims
- Appendix 3: Chi square test for association between type of accident and type victim's position on the vehicle
- Appendix 4: Chi square test for association between type of accident and topographical distribution of injury
- Appendix 5: Chi square test for association between type of accident and head and neck injury
- Appendix 6: Chi square test for association between type of accident and chest injury
- Appendix 7: Chi square test for association between type of accident and abdomen and pelvic injury
- Appendix 8: Chi square test for association between type of accident and back injury
- Appendix 9: Chi square test for association between type of accident and upper extremities injury
- Appendix 10: Chi square test for association between type of accident and upper extremities injury
- Appendix 11: Checklist for data collection
- Appendix 12: Ethical Clearance
