

TABLE OF INDEX

COVER PAGE	ii
RATIFICATION PAGE	iii
STATEMENT PAGE	iv
DEDICATION PAGE	v
PREFACE	vi
TABLE OF INDEX	vii
LIST OF FIGURES	x
LIST OF TABLES	xi
LIST OF ATTACHMENTS	xii
ABSTRACT	xiii
INTISARI	xiv
CHAPTER I: INTRODUCTIONS	1
I.1 Research Background	1
I.2 Reasearch Objectives	4
I.3 Research Benefits	4
CHAPTER II: LITERATURE REVIEW AND HYPOTHESIS FORMULATION	5
II.1 Literature Review	5
II.1.1 Activated carbon	5
II.1.2 Adsorption	7
II.1.3 Sawdust adsorbent modification	12
II.1.4 Copper	14
II.1.5 Citric acid	15
II.2 Hypothesis Formulation	16
II.2.1 Hypothesis formulation 1	16
II.2.2 Hypothesis formulation 2	17

II.2.3 Hypothesis formulation	3	17
II.2.4 Research planning		17
CHAPTER III: RESEARCH METHODS		19
III.1 Material and Equipment		19
III.1.1 Materials		19
III.1.2 Equipments		19
III.2 Research Procedure		19
III.2.1 Sawdust carbonization and activation		19
III.3.2 Sawdust adsorbent modification with citric acid		20
III.3.3 Influence of pH on copper adsorption		20
III.3.4 Optimal contact time of copper adsorption		21
III.3.5 Effect of adsorbate concentration		21
CHAPTER IV: RESULTS AND DISCUSSION		22
IV.1 Citric Acid Modified Activated Carbon Synthesis Results		22
IV.2 Modified Sawdust Derived Activated Carbon Characterization		25
IV.2.1 Fuctional group characterization after activation		25
IV.2.2 Functional group characterization after modification		27
IV.2.3 FTIR characterization after adsorption		28
IV.2.4 Carboxylic group characterization by Boehm titration		30
IV.3 Adsorption Studies of Copper by Modified Activated Carbon		32
IV.3.1 Effect of pH on Cu adsorption		32
IV.3.2 Adsorption kinetics		33
IV.3.3 Effect of initial concentration and adsorption isotherm		36
IV.4 SEM Analysis of Adsorbent		39

CHAPTER V: CONCLUSIONS AND SUGGESTIONS	41
V.1 Conclusions	41
V.2 Suggestions	41
REFERENCES	42
ATTACHMENTS	46

LIST OF FIGURES

Figure II.1	Surface scheme of activated carbon surface (Qing-Fang, 2012)	5
Figure II.2	Copper speciation chart as a function of pH (Cuppett et al., 2006)	14
Figure II.3	Citric acid structure (Apelblat, 2014)	16
Figure IV.1	Functional group formation scheme through esterification reaction between citric acid and sawdust derived activated carbon (Thahn and Nhung, 2009)	24
Figure IV.2	FTIR spectra of (a) unactivated carbon and (b) activated carbon	25
Figure IV.3	FTIR spectra of (a) citric acid 4 M modified activated carbon (b) citric acid 1 M modified activated carbon (c) unmodified activated carbon	27
Figure IV.4	Adsorbent FTIR spectra after adsorption	29
Figure IV.5	Effect of pH for Cu adsorption	32
Figure IV.6	Adsorption contact time of citric acid modified and unmodified activated carbon	34
Figure IV.7	Adsorption in variation of adsorbate concentration	36
Figure IV.8	Interaction between copper metal and oxygen atom from surface of adsorbent	39
Figure IV.9	SEM image of (a) unmodified carbon (b) modified carbon	39

LIST OF TABLES

Table II.1	Isotherm model for Cu adsorption in various adsorbents	10
Table II.2	Kinetical model of copper adsorption in various adsorbents	12
Table IV.1	Table of activated carbon and unactivated carbon FTIR peaks	26
Table IV.2	Table of modified activated carbon and unmodified activated carbon FTIR peaks	28
Table IV.3	FTIR spectra peaks of the adsorbent before and after adsorption	30
Table IV.4	Amount of carboxylic acid group for each adsorbent	31
Table IV.5	Table of adsorption reaction rate coefficient	35
Table IV.6	Adsorption isotherm experimental data	37

LIST OF ATTACHMENTS

Attachment 1: IR Spectra of Inactivated Carbon	46
Attachment 2: IR Spectra of Unmodified Activated Carbon	47
Attachment 3: IR Spectra of Citric Acid 1 M Modified Activated Carbon	48
Attachment 4: IR Spectra of 4 M Citric Acid Modified Activated Carbon	49
Attachment 5: IR Spectra of Modified Activated Carbon After Adsorption	50
Attachment 6: Concentration of Carboxylic Acid	51
Attachment 7: Adsorption Optimal pH Determination	54
Attachment 8: Effect of Contact Time Towards The Adsorption	55
Attachment 9: Adsorption Kinetics	57
Attachment 10: Adsorption Isotherm	59
Attachment 11: Effect of Initial Concentration Towards Adsorption	63
Attachment 12: SEM Images of Adsorbent	64
