

## DAFTAR PUSTAKA

- A. Bergmann, D. Hummel. “*Aerodynamic effects of canard position on a wing body configuration in symmetrical flow*”. *AIAA Paper 2001-0116*.
- ANSYS ICEM CFD User Manual. 2016. SAS IP, Inc.
- B.B. Gloss, L.W. McKinney. 1973. “*Canard-wing Lift Interference Related to Maneuvering Aircraft at Subsonic Speeds*”. NASA TM X-2897.
- B.I. Soemarwoto, O.J. Boelens. “*Simulation of Vortical Flow Over a Slender Delta Wing Experiencing Vortex Breakdown*”. National Lucht-en Ruimtevaartlaboratorium. NLR-TP-2003-396.
- B.R. Munson. 2009. “*Fundamentals of Fluid Mechanics 6<sup>th</sup> Edition*”. John Wiley & Sons. ISBN 978-0470-26284-9.
- C. Hirsch. 2007. “*Numerical Computation of External and Internal Flows 2<sup>nd</sup> Edition*”. John Wiley and Sons. ISBN: 978-0-7506-6594-0
- C. Mingqian, L. Peiqing, G. Hao, Q. Qiulin. 2015. “*Effect of Sideslip on High-Angle-of-Attack Vortex Flow Over Close-Coupled Canard Configuraion*”. AIAA. 1533-3868/15.
- C.Wiratama. 2018. “*Studi Numerik Aliran Sekitar Pesawat Chengdu J-10 Like dan Pesawat Sukhoi Su-30 Like pada Kecepatan Subsonic*”. Fakultas Teknik. Universitas Gadjah Mada. Yogyakarta
- Daniel P. Raymer. 1992. “*Aircraft Design : A Conceptual Approach 2<sup>nd</sup> Edition*”. American Institute of Aeronautics and Astronautics, Inc. ISBN 0-930403-51-7.
- Er-El, J., and Seginer, A. 1985. “*Vortex Trajectories and Breakdown on Wing-Canard Configurations*”. *Journal of Aircraft*, Vol. 22, No. 8, Aug. 1985, pp. 641-648.
- F. Moukalled, L. Mangani, M. Darwish. 2015 “*The Finite Volume Method in Computational Fluid Dynamics*”. Springer. ISBN 978-3-319-16873-9
- G. Haller. 2005. “*An Objective Definition of a Vortex*”. *J. Fluid Mech.* (2005), vol. 525, pp. 1-26. Cambridge University Press.
- H. Behrbohm. 1965. “*Basic Low Speed Aerodynamics of The Short-Coupled Canard Configuration of Small Aspect Ratio*”. SAAB Aircraft Co. TN-60, Linkoping, Sweden.
- I.H. Tuncer, M.F. Platzer. 1996. “*A computational study of a close-coupled delta canard-wing-body configuration*”. *AIAA Paper 96-2440-CP*.
- I. Gursul. 2004. “*Recent Developments in Delta Wing Aerodynamics*”. *The Aeronautical Journal*. Paper no. 2894.

- J.D. Anderson Jr. 1995. 1995. “*Computational Fluid Dynamics: The Basics with Applications*”. McGraw Hill. ISBN 0-07-113210-4.
- J.D. Anderson Jr. 2007. “*Fundamentals of Aerodynamics: Fifth Edition in SI Units*”. McGraw Hill. ISBN 978-1-259-01028-6.
- J. Staszek. 1979. “*Comparison of The Aerodynamic Properties of Aircraft With a Canard and a Conventional Arrangement*”. Foreign Technology Division, FTD - ID(RS)T-0730-79
- L.S. Brian, L.L. Frank, N.J. Eric. 2015. “*Aircraft Control and Simulation: Dynamics, Controls Design and Autonomous Systems*”. John Wiley & Sons, Inc., Hoboken, New Jersey.
- LU Zhi-yong, ZH U Li-guo. 2004. “*Study on Forms of Vortex Breakdown over Delta Wing*”. Chinese Journal of Aeronautics, Vol. 7, No. 1.
- M. Lee, C.M. Ho. 1990. “*Lift Force of Delta Wings*”. Applied Mechanics Reviews, 43, (9), pp 209-221.
- O.J. Boelens. 2012. “*CFD Analysis of the Flow Around the X-31 Aircraft at High Angle of Attack*”. Aerospace Science and Technology 20 (2012) 38-51.
- Rahman, Hammad & Khushnood, Shahab & Raza, A & Ahmad, Kamran. 2013. “*Experimental and computational investigation of delta wing aerodynamics*”. 203-208. 10.1109/IBCAST.2013.6512155.
