

ABSTRACT

The study of responsive bureaucracy in adopting social change has not been widely conducted. This study aims at understanding, explaining responsive or irresponsible bureaucracy and finding out the patterns of responsive bureaucracy. So the pattern can adopt social change in East Java especially Surabaya and Mojokerto.

The degree of responsiveness of the bureaucracy is influenced by several factors :

- First : The ability of bureaucracy to design, management structure which consists of organizing, planning leading and controlling.
- Second : - The power of reorientation structure from centralization to decentralization.
- The reorientation culture from patrimonial to democracy with the spirit of entrepreneurship and partnership.
- Third : The neutrality of bureaucracy are its environment

There are three theories that can be anticipated as a precondition of the pattern of responsive bureaucracy :

1. In order to respond social changes the bureaucracy must open and it have the ability to stand on its own.
2. Profesionalism of bureaucracy will be responsive bureaucracy because of its autonomy.
3. The role of religion in brings socio-cultured change the institution of religion can adopt science and technology though two-way communication, that is "dialogue" approach" or partnership among members.
