

Conclusion

The development of transactive memory :: The role of emotional intelligence and task interdependence

AMEROSI, Meta Bagus, Drs. Hanneke Grutterink

Universitas Gadjah Mada, 2009 | Diunduh dari <http://etd.repository.ugm.ac.id/>

This study has shown that teams with emotionally smart individuals and teams in which the members are highly task interdependent develop better transactive memories. This study underlines the importance of EI in teams and provides a basis for both practitioners and scientists for future research on the antecedents of TM and to develop practical implications based on that.
