

TABLE OF CONTENTS

APPROVAL SHEET	i
DECLARATION.....	ii
ACKNOWLEDGEMENT	iii
ABSTRACT	iv
SARI	v
TABLE OF CONTENTS.....	vi
LIST OF FIGURES	viii
LIST OF TABLES	xi
LIST OF APPENDICES	xii
LIST OF ABBREVIATIONS	xiii
 CHAPTER 1. INTRODUCTION	 1
1.1 Background	1
1.2 Problem formulation	1
1.3 Objectives.....	2
1.4 Location of study	2
1.5 Limitation of research	2
1.6 Research outcome	3
1.7 Previous research	3
 CHAPTER 2. LITERATURE REVIEW	 6
2.1 Regional geology	6
2.1.1 Physiography.....	6
2.1.2 Geological structure and tectonic setting	7
2.1.3 Stratigraphy	9
2.1.4 Potential of Ngrayong sandstone as reservoir.....	12
2.2 Background theory	12
2.2.1 Reservoir overview	12
2.2.2 Characteristics and physical properties of reservoir rock	13
2.2.3 Granulometry	22
2.2.4 Sedimentary structure, facies and depositional environment	25

CHAPTER 3. HYPOTHESIS AND RESEARCH METHODS	32
3.1. Hypothesis	32
3.2. Methods	32
3.2.1 Research data	32
3.2.2 Research material	33
3.3. Research framework	34
3.3.1 Research phase	34
3.3.2 Flow chart	37
CHAPTER 4. RESERVOIR PROPERTIES AND LITHOFACIES	38
4.1. Stratigraphic log	38
4.2. Sampling analysis and measurement	41
4.2.1 Petrography	41
4.2.2 Granulometry	41
4.2.3 Petrophysic	43
4.2.4 Lithofacies	44
4.3. Facies association (FA) and depositional environment	53
4.3.1. Facies association 1 – FA1 (Tidal-dominated shallow shelf)	53
4.3.2. Facies association 2 – FA2 (Lower continental slope)	54
4.4. Vertical and lateral succession	56
4.5. Dynamic sedimentation	58
CHAPTER 5. RESERVOIR POTENTIAL OF NGRAYONG SANDSTONE	61
5.1. Porosity	61
5.2. Permeability	62
5.3. Potential reservoir	63
CHAPTER 6. CONCLUSION AND RECOMMENDATION	66
6.1. Conclusion	66
6.2. Recommendation	67
REFERENCES	68

LIST OF FIGURES

Figure 1.1.	Location of study area (Western Part of Madura).....	4
Figure 2.1.	Physiography of East Java (Pramono, 2008 after Van Bemmelen, 1949)	6
Figure 2.2.	Geological map of Western Part of Madura Island (Combination of Geological Map of Tanjungbumi & Pamekasan Quadrangle, Jawa by S. Azis, Sutrisno, Y. Noya, and K. Brata and Geological Map of The Surabaya & Sapulu Quadrangle, Jawa by J. B. Supandjono, K. Hasan, H. Panggabean, D. Satria, and Sukardi (1992).	8
Figure 2.3.	Stratigraphic record of Western Part of Madura Island (S. Azis, Sutrisno, Y. Noya and K. Brata, 1992)	10
Figure 2.4.	Three basic types of pores (Selley, 1998)	14
Figure 2.5.	Sand grains showing the difference between shape and sphericity (Lutgens <i>et al.</i> , 2012)	17
Figure 2.6.	Sorting. From left to right, porosity and permeability are gradually increased (Lutgens <i>et al.</i> , 2012)	17
Figure 2.7.	The loosest and tightest theoretical packing for spheres of uniform diameter (Selley, 1998)	18
Figure 2.8.	Block diagram of sand showing layered fabric with grains oriented parallel to current, generally $K_x > K_y > K_z$ (Selley, 1998)	19
Figure 2.9.	The burial processes of compaction and cementation (Slatt, 2006).....	20
Figure 2.10.	Pressure solution and reprecipitation (Slatt, 2006)	21
Figure 2.11.	Percentile value from cumulative curve.....	23
Figure 2.12.	The Wentworth grain-size scale of sediments	24
Figure 2.13.	A cross-section from the continental shelf through the continental slope and rise down to the abyssal plain (Nichols, 2009).....	27
Figure 2.14.	Slope apron deposits include pelagic sediment, slumps,	

	debris flows and sands from the shelf edge (Stow, 1985).....	29
Figure 2.15.	High- and low-density flows and turbidite deposits (Biju-Duval, 2002)	30
Figure 2.16.	General organization of turbidite deposit (Biju-Duval, 2002)	31
Figure 3.1.	Research flow chart about activities and phases of research	37
Figure 4.1.	Stratigraphic log of STA3	38
Figure 4.2.	Stratigraphic log of STA2	39
Figure 4.3.	Stratigraphic log of STA1	40
Figure 4.4.	Heterolithic sandstone facies with (a) thickly laminated flaser, (b) thickly laminated wavy.....	46
Figure 4.5.	Carbonaceous shale facies with (a) sharp contact at lower and gradational with cross-laminated sandstone facies at upper and (b) horizon burrow.	47
Figure 4.6.	Cross-laminated sandstone facies with (a) cross-bedding trough and (b) herringbone cross-stratification.....	49
Figure 4.7.	Laminated mudstone facies with (a) light grey, thickly bedded, friable shale and (b) dark grey, thickly bedded silty mudstone.	50
Figure 4.8.	Upper fan turbidites facies with (a) ferruginous nodules at lower part and (b) parallel lamination at upper part of facies.	51
Figure 4.9.	Bioclastic carbonate facies with (a) large foraminifera and clastic material, and (b) sandy bioclastic component.....	52
Figure 4.10.	Mixed siliciclastic-carbonate facies with (a) yellowish, very coarse grain and (b) fauna assemblage Cyclocypeus species.	53
Figure 4.11.	Lithofacies association log of tidal-dominated shallow shelf from STA3	54
Figure 4.12.	Lithofacies association log of tidal-dominated shallow shelf from STA2	55
Figure 4.13.	Lithofacies association log of lower continental slope from STA1 ...	56
Figure 4.14.	Stratigraphic correlation of Ngrayong Sandstone in Western Part of Madura Island.....	58
Figure 5.1.	Texture of (a) lithic arenite (b) greywacke under microscope.....	62

Figure 5.2. Texture of sand micrite (a) STA2-4 and (b) STA2-8..... 62

LIST OF TABLES

Table 2.1.	Classification of the different types of porosity found in sediments (Murray, 1960).....	15
Table 2.2.	Range of porosity classification (North, 1985).....	15
Table 2.3.	Range of permeability classification (North, 1985).....	16
Table 2.4.	Summary of zone of sandstone diagenetic process (Surdam <i>et al.</i> , 1989)	21
Table 2.5.	Sorting vs. standard deviation.....	25
Table 4.1.	Texture of sandstone derived from petrographic analysis	42
Table 4.2.	Result of ϕ_n value derived from cumulative curve.....	42
Table 4.3.	Mean value derived from graphic method	43
Table 4.4.	Sorting value derived from graphic method	44
Table 4.5.	Summary result of petrophysic analysis	44
Table 5.1.	Classification of qualitative porosity (Koesoemadinata, 1980).....	64

LIST OF APPENDICES

APPENDICES	72
APPENDIX I. Granulometric analysis	73
1. Validity of initial data	73
2. Cumulative frequency curve (Arithmetic scale)	74
APPENDIX II. Petrography analysis	81
1. Image and description	81
2. Summary result of petrographic analysis	90
APPENDIX III. Petrophysic analysis.....	91
APPENDIX IV. Stratigraphic logs.....	91

LIST OF ABBREVIATIONS

SEM	Scanning electron microscope
STAx	Location of measured stratigraphic section e.g. STA1 or STA2
STAx-LxTS	Sample code of thin section from specific location and layer e.g. STA1-L4TS
STAx-LxG	Sample code of granulometric analysis from specific location and layer e.g. STA1-L4G
STAx-LxPK	Sample code of petrophysic analysis (porosity and permeability) from specific location and layer e.g. STA1-L4PK
XRD	X-ray diffraction
