ABSTRACT

Pork is one of the animal's products which is very popular for Indonesian people, therefore, the quality of the pigs maintenance in farms must be well maintained and in accordance with the Standard Operating Procedure (SOP), especially reproduction problems that play an important role in keeping pig populations in order to fulfill market needs about pork. The purpose of this Final Project is to find out the reproduction status of pigs in CV Adhi Farm. Data taken based on information from employees at CV Adhi Farm, direct observation, and recording data carried out from March 19, 2018 to March 31, 2018. The results of the observations were all treatments in the field were good enough, but there were several things that must be improved such as employees awareness about the welfare of pigs that are maintained.
