TITLE PAGE	i
APPROVAL PAGE	ii
HALAMAN PENGESAHAN	iii
PRONOUNCEMENT	iv
PREFACE	v
ACKNOWLEDGEMENT	vi
TABLE OF CONTENTS	vii
LIST OF FIGURES	ix
LIST OF TABLES	xi
LIST OF ABBREVIATIONS	xii
LIST OF SYMBOLS	xiii
ABSTRACT	xiv
INTISARI	xv
CHAPTER I INTRODUCTION	1
1.1. Research Background	1
1.2. The Problem Formulation	2
1.3. The Limitations of Problem	2
1.4. The Research Objectives	3
1.5. The Benefit of Research	3
CHAPTER II LITERATURES REVIEW	4
CHAPTER III THEORETICAL BACKGROUND	7
3.1. Mineral Trioxide Aggregate	7
3.1.1. Composition of Un-hydrated Mineral Trioxide Aggregate	7
3.1.2. Setting Reaction	9
3.1.3. Effect of Water	10
3.2. Mechanical Testing	11
3.2.1. Compression Test	11
3.2.2. Hardness Test	13

3.3. Physical Properties Testing	14
3.3.1. X-ray Diffraction	14
3.3.2. Scanning Electron Microscope	15
3.3.3. Porosity Estimation	15
3.3.4. Density Measure	16
CHAPTER IV RESEARCH METHODS	17
4.1. Materials	17
4.2. Apparatus	17
4.3. Research Procedure	21
CHAPTER V RESULTS AND DISCUSSION	25
5.1. X-ray Fluorescence Analysis of Un-hydrated MTA	25
5.2. X-ray Diffraction Analysis of Hydrated MTA	26
5.3. Scanning Electron Microscope Examination of Hydrated MTA	27
5.4. The Effect of Water-to-Powder Ratio on Porosity	29
5.5. The Effect of Water-to-Powder Ratio on Density	31
5.6. The Saturation of MTA	32
5.7. The Effect of Water-to-Powder Ratio on Compressive Strength	32
5.8. The Effect of Water-to-Powder Ratio on Microhardness	34
5.9. The Effect of Porosity on Compressive Strength and Microhardness	36
CHAPTER VI CONCLUSIONS AND RECOMMENDATIONS	38
6.1. Conclusions	38
6.2. Recommendations	38
REFERENCES	39
