LIST OF TABLES	viii
LIST OF FIGURES	x
INTISARI	xi
ABSTRACT	xii
CHAPTER I INTRODUCTION	1
1.1 Background	1
1.2 Objective	4
CHAPTER II LITERATURE REVIEW	5
2.1 Lactic Acid Bacteria.....	5
2.2 Growth of Lactic Acid Bacteria	6
2.3 Metabolic Pathway of Lactic Acid Bacteria	7
2.4 <i>Lactobacillus plantarum</i>	9
2.5 <i>Lactococcus lactis</i>	10
2.6 Nham.....	11
2.7 Microbiological Contaminant in Nham	14
2.8 Starter Culture	18
2.8.1 Starter Cultures in Nham Fermentation	18
2.8.2 Dried Starter Cultures.....	20
2.9 Hypotheses	21
CHAPTER III MATERIALS AND METHODS.....	22
3.1 Materials	22
3.1.1 Halal fermented chicken sausage (Nham Kai).....	22
3.1.2 Dried Starter Culture	23
3.1.3 Materials for Analysis	23
3.2 Equipments	24
3.3 Steps of Research	24
3.4 Experimental Method.....	26
3.4.1 Experimental Design of Fermentation of Halal Chicken Sausage (Nham Kai).....	26
3.4.2 Experimental Design of Dried Starter Culture	27
3.4.3 Starter Culture Preparation.....	27
3.4.4 Fermentation of halal chicken sausage (Nham Kai)	28
3.4.5 Dried Starter Culture Production.....	29
3.5 Analytical Method	30
3.5.1 Halal fermented chicken sausage (Nham Kai).....	30

3.5.1.1 Chemical Analysis	31
3.5.1.2 Microbiological Analysis.....	31
3.5.1.3 Physical Analysis	34
3.5.1.4 Sensory Evaluation	35
3.5.2 Dried Starter Culture	36
3.5.2.1 Microbiological Analysis.....	36
3.5.2.2 Physical Analysis	36
3.5.3 Statistical Analysis	37
CHAPTER IV RESULTS AND DISCUSSION.....	38
4.1 Effect of starter cultures on properties of halal fermented chicken sausage (Nham Kai)	38
4.1.1 Chemical quality changes during fermentation of halal chicken sausage (Nham Kai)	38
4.1.2 Microbiological quality during fermentation of halal chicken sausage (Nham Kai)	43
4.1.3 Physical quality changes during fermentation of halal chicken sausage (Nham Kai)	48
4.1.4 Sensory Evaluation of halal fermented chicken sausage (Nham Kai).....	55
4.2 Effect of sugar and MSG on dried starter culture stability	57
4.2.1 Viability of lactic acid bacteria in dried starter culture during storage at 4 °C	57
4.2.2 Physical Changes during Storage	58
CHAPTER V CONCLUSION AND SUGGESTION.....	61
5.1 Conclusion	61
5.2 Suggestion.....	61
REFERENCE.....	63
APPENDIX.....	67
