PREFACE	v
TABLE OF CONTENTS	vi
TABLE OF FIGURES	ix
TABLE OF TABLES	xi
INTISARI	xii
ABSTRACT	xiii
 CHAPTER 1 INTRODUCTION	 1
1.1 Background	1
1.2 Research Questions	2
1.3 Aims and Objectives	3
1.4 Limitations	3
1.5 Benefits	3
1.6 Authenticity	3
 CHAPTER 2 LITERATURE REVIEW	 4
2.1 Highway Bridge	4
2.1.1 Highway Bridge Types	4
2.1.2 Prefabricated Bridge	6
2.1.3 Steel Box Girder Bridge	6
2.2 Pinned Connection	7
2.3.1 Elastic Stress Distribution	7
2.3.2 Bearing Stress and Deformation	9
2.3.3 Static Strength Limit States	10
2.3 Unibridge System	14

CHAPTER 3	THEORETICAL FRAMEWORK	16
3.1	Steel Box Girder	16
3.1.1	Box Girder Behavior	16
3.1.2	Composite Girder	16
3.2	Loads and Load Factors	17
3.2.1	Permanent Loads	17
3.2.2	Traffic Live Loads	18
3.2.3	Temperature Effect	21
3.2.4	Wind Loads	23
3.2.5	Earthquake Effects	25
3.2.6	Load Factors and Combinations	26
3.3	Section Analysis	26
3.3.1	Girder Section Proportion	26
3.3.2	Elastic Section Properties	28
3.3.3	Plastic Section Properties	28
3.4	Steel Box Analysis	29
3.4.1	Constructability	29
3.4.2	Service Limit State	33
3.4.3	Strength Limit State	33
3.4.4	Fatigue Limit State	35
3.5	Pinned Connection Analysis	35
CHAPTER 4	RESEARCH METHODS	40
4.1	Analysis Procedure	40
4.2	Analysis Parameter	41
4.2.1	General Parameter	41
4.2.2	Stiffener Parameter	44
4.2.3	Pinned Connection Parameter	44
4.3	Modelling	45
CHAPTER 5	RESULTS AND DISCUSSION	46
5.1	Structure Analysis Results	46

5.2	Superstructure Analysis of the Bridge.....	47
5.2.1	Section Properties	47
5.2.2	Girder Cross-Section Proportions	51
5.2.3	Constructability Requirement	53
5.2.4	Service Limit State	56
5.2.5	Strength Limit State	57
5.2.6	Pinned Connection	60
5.2.7	Fatigue.....	65
5.3	Discussion	67
5.3.1	Analysis Results	67
5.3.2	Comparison Between Unibridge and Other Systems.....	69
5.3.3	Construction methods	71
CHAPTER 6	CONCLUSION AND RECOMMENDATION	74
6.1	Conclusion.....	74
6.2	Recommendation.....	74
BIBLIOGRAPHY	76
APPENDIX	79
