

INTISARI

Danau Paisupok adalah danau alami yang berada di Desa Luk Panenteng, Bulagi Utara, Kabupaten Banggai Kepulauan, Sulawesi Tengah. Danau Paisupok memiliki keindahan dan kejernihan air yang menarik. Selain itu, disekitar danau terdapat hutan yang masih alami dan asli dimana di dalamnya terdapat hewan endemik yang hanya bisa ditemukan di Kabupaten Banggai Kepulauan yaitu Gagak Peling dan *Tarsius*. Berdekatan dengan Danau Paisupok terdapat permukiman Desa Luk Panenteng yang memiliki kekayaan budaya suku Sea-sea, suku asli wilayah Banggai. Hal tersebut menjadi potensi strategis untuk menjadi daya tarik wisata. Danau Paisupok tidak berdiri sendiri, ada dua destinasi wisata lainnya di Desa Luk Panenteng yaitu Pantai Poganda dan Mata Air Paisu Batango. Hal tersebut dapat menguatkan Danau Paisupok sebagai destinasi wisata. Kondisi eksisting kegiatan wisata di Danau Paisupok sudah berjalan setelah adanya kegiatan KKN UGM 2018, akan tetapi kegiatan wisata yang sudah berjalan akan menyebabkan berkurangnya unsur ekologis Danau Paisupok. Oleh karena itu perlu dilakukan penataan kembali kawasan wisata Danau Paisupok yang mencakup area danau dan hutan yang mengelilinginya serta permukiman Desa Luk Panenteng untuk menjaga kelasian alam dari Danau Paisupok dan meningkatkan daya tarik dan kualitas pelayanannya yang saling terintegrasi.

Konsep *integrated ecotourism planning* merupakan konsep utama berupa perencanaan untuk mengupayakan pelestarian alam dan budaya, serta mengedukasi wisatawan terkait pentingnya menjaga alam dipadukan dengan fasilitas dan atraksi yang saling terintegrasi. Konsep ini diimplementasikan kedalam tujuh elemen Perencanaan yaitu zonasi, bangunan, fasilitas pendukung, ruang preservasi, sirkulasi, kelembagaan dan promosi informasi. Penataan kawasan Danau Paisupok ini akan menghasilkan rencana detail, masterplan dan rencana kelembagaan dan pembiayaan dan investasi dalam penataan kawasan tersebut.

Kata Kunci: Danau Ekowisata, Integrasi Destinasi Wisata, Konservasi, Kelembagaan

ABSTRACT

Paisupok Lake is the nature lake which is located in Luk Panenteng, North Bulagi, Banggai Kepulauan District. Paisupok Lake has an interested wonderful and pure water. Other wise, There is a pure and naturely forest arround the lake which has endemik animals that can be found in Banggai Kepulauan District, those are Peling Crow dan Tarsius. Nearby from the Paisupok Lake has a settlement Luk Panenteng Village that has a culture Sea-sea people, The native tribe Banggai regency. Those all could be a strategic potensial to become the attractiveness for the tourist. The Paisupok Lake is not the one built, There are another two destination resorts in Luk Panenteng, namely Poganda Beach and Paisu Batango Water Springs. Those all could improve the Paisupok Lake as resort destination. An exsisting condition resort activity has operated in Paisupok Lake after KKN UGM 2018 activity be held, However, tourisme activity that has be held cause an ecologist element decrease process of Paisupok Lake. Therefore, it must be replan activity for Paisupok Lake which is covered the lake and forest area that is surrounded its and so the settlement of Luk Panenteng for increase the attractiveness and the service quality with keep the environment sustainability.

The integrated ecotourism planning concept is the main concept in the form a planning to conservation of nature and culture, and also educate the tourists about how the important of keep the nature and collaborate with the facility and attraction which is intergrated each other. This Concept is implemented into 7 element of Planning, namely zonation, building, support facility, preservation room, circulation, organitation and information promotion. The arrangement of Paisupok Lake area would result the detail plan, masterplan and organitation plan and so financial and investment in the arrangement area.
