

LIST OF EQUATION	vii
LIST OF FIGURES	viii
LIST OF TABLES	x
ACKNOWLEDGEMENT	xi
ABSTRACT.....	xiv
CHAPTER 1. INTRODUCTION	1
1.1. Background.....	1
1.2. Research Problem.....	3
1.3. Objectives	3
1.4. Problem Limitation.....	3
1.5. Benefit	3
1.6. Research Originality	3
CHAPTER 2. LITERATURE REVIEW	5
1.1. Introduction	5
1.2. Green Building	5
1.3. Sustainable Building Policies	11
1.4. Green Roof System.....	13
1.5. The Effect of Urban Vegetation	14
1.6. The Effect of Radiation	16
1.7. The Effect of Heat Factor to the Existing Building.....	17
1.8. Thermal Performance of Green Roof	18
1.9. Thermal Reduction due to Green Open Space	20
CHAPTER 3. BASIC THEORY	22
3.1. Green Building Standard	22
3.1.1. Green Architecture.....	22
3.1.2. Green Building.....	22
3.2. Considered Criteria of Green Building.....	22
3.2.1. Green Materials.....	23
3.2.2. Water Efficiency	25
3.2.3. Green Site Design	25
3.2.4. Operation and Maintenance	26
3.2.5. Indoor Environmental Quality	26
3.3. Types of Green Roof	26
3.3.1. Intensive Green Roof	27
3.3.2. Semi Intensive Green Roof	27

3.3.3.	Extensive Green Roof	28
3.4.	Impact of Green Roof	28
3.5.	Steady Heat Conduction	29
3.6.	Urban Heat Island	31
3.6.1.	Low Albedo Materials	32
3.6.2.	Human Gathering	35
3.6.3.	Increased Use of Air Conditioner	35
3.6.4.	Destruction of Trees	35
3.6.5.	Urban Canopy	36
3.6.6.	Air Pollutants	36
3.6.7.	Wind Blocking	37
CHAPTER 4.	METHODOLOGY	39
4.1.	Simulation Model and Boundary Condition	39
4.2.	Parametric Boundary	42
4.3.	PALM/LES	43
4.4.	Validation Model	45
4.5.	Indoor and Outdoor Thermal	45
4.5.1.	External Factor	45
4.5.2.	Internal Factor	46
4.6.	Potential Temperature	46
4.7.	Turbulence Kinetic Energy	47
4.8.	Vorticity	51
CHAPTER 5.	RESULT AND DISCUSSION	53
5.1.	Comparison Between Conventional Building and Green Rooftop	53
5.1.1.	Potential Temperature (PT)	53
5.1.2.	Turbulence Kinetic Energy (TKE)	57
5.1.3.	Wind Flow Pattern	60
5.2.	Comparison between vegetation on 1m above the ground (green floor) and on the top of the building (green rooftop)	70
5.2.1.	Potential Temperature (PT)	70
5.2.2.	Turbulence Kinetic Energy (TKE)	74
CHAPTER 6.	CONCLUSION AND RECOMMENDATION	77
