EFFECT OF INDIVIDUAL VOLATILE FATTY ACIDS (VFAs) ON THE GROWTH OF *Rhizopus microscopus* var.

***oligosporus* CBS 112586 IN BATCH FERMENTATION**

AFRILIA DWI K, Dr. Ria Millati, S.T., M.T; Rachma Wikandari, S.TP., M.Biotech., Ph.D

Universitas Gadjah Mada, 2019 | Diunduh dari <http://etd.repository.ugm.ac.id/>

LIST OF CONTENTS

Cover.....	i
Approval Sheet	ii
Declaration of Authenticity	iii
Sheet of Dedication.....	iv
Acknowledgements.....	v
Preface.....	vii
Table of Content	viii
List of Tables.....	x
List of Figures.....	xi
List of Appendices.....	xiii
Abstract	xiv

CHAPTER I INTRODUCTION

1.1.Background.....	1
1.2.Research Questions.....	3
1.3.Objectives.....	3
1.4.Advantages of The Study	3

CHAPTER II LITERATURE STUDY

2.1. Volatile Fatty Acids (VFAs).....	4
2.1.1. Volatile fatty acids- derived organic waste	4
2.1.2. Types of volatile fatty acid	7
2.1.3. Concentration of volatile fatty acid- derived organic waste.....	11
2.2. Edible Fungi	12
2.2.1. <i>Rhizopus microscopus</i> var. <i>oligosporus</i>	13
2.2.2. Morphology	13
2.2.3. Metabolic Pathways	15
2.3. Factors Influencing Aerobic- Submerged Fermentation.....	17
2.3.1. Medium formulation.....	18
2.3.2. pH	20
2.3.3. Acid concentration	21
2.3.4. Aeration and agitation	22

CHAPTER III RESEARCH METHODOLOGY

3.1. Materials	23
3.1.1. Fungal strain.....	23
3.1.2. Synthetic medium.....	23

3.2. Methods	24
3.2.1. Cultivation in shake flasks.....	24
3.2.2. Analysis	25

BAB IV RESULTS AND DISCUSSION

4.1. Effect of Different pH on Fungal Growth.....	28
4.2. Effect of Yeast Extract Addition and Carbon Sources on Fungal Growth ..	28
4.3. Fungal Growth on Volatile Fatty Acids (VFAs) Medium	31
4.4. Fungal Morphology	37

BAB V CONCLUSION AND FUTURE WORK

5.1. Conclusion.....	41
5.2. Future Work.....	42

LIST OF TABLES

Table 2.1. Characteristic of volatile fatty acids	10
Table 2.2. Concentration of volatile fatty acid production from various organic wastes	11
Table 2.3. Mycelium Production from <i>Rhizopus</i> with several carbon sources.....	12
Table 2.4. The classification of <i>Rhizopus microscopus</i> var. <i>oligosporus</i>	13
Table 2.5. Composition of yeast extract	19
Table 2.6. Initial VFAs concentration, pH value, and corresponding unVFAs in the mixed.....	21
Table 3.1. Chemical composition on synthethic medium.....	23
Teble 3.2. Design experiment of cultivations in shake flasks with synthetic carbon Source	24
Table 4.1. Yields of fungal biomass on volatile fatty acids (VFAs) medium with different pH and concentration.....	35

LIST OF FIGURES

Fig. 2.1. Process of anaerobic digestion.....	5
Fig. 2.2. Metabolic pathways from protein and polysaccharide to organic	5
Fig. 2.3 Simplified possible metabolic pathways during anaerobic fermentation by mixed cultures of glycerol	6
Fig. 2.4. Structure of acetic acid.....	7
Fig. 2.5. Structure of propionic acid	7
Fig. 2.6. Structure of butyric acid.....	8
Fig. 2.7. Structure of isobutyric acid	8
Fig. 2.8. Structure of valeric acid	9
Fig. 2.9. Structure of isovaleric acid.....	9
Fig. 2.10. Structure of caproic acid.....	10
Fig 2.11. <i>Rhizopus oligosporus</i> at magnification 40x	13
Fig.2.12. Pyruvate branch point of <i>Rhizopus oryzae</i>	15
Fig. 2.13. Scheme of metabolic pathways for assimilation of acetate and butyrate in microalgae	17
Fig. 4.1. Yields of fungal biomass in 10 g/L of glucose in different pH	28
Fig. 4.2. Yields of fungal biomass in 10 g/L (A) glucose with yeast extract; (B) glucose without yeast extract; (C) acetic acid with yeast extract at pH 6	29
Fig. 4.3. Yields of fungal dried biomass on acetic acid medium in different pH and concentratios	32
Fig. 4.4. (a) Fungal cultivation in 1 g/L acetic acid medium at pH 7 ; (b) Fungal cultivation in 1 g/L acetic acid medium at pH 6.....	33
Fig.4.5. Yields of fungal dried biomass on (a) propionic; (b) butyric; (c) isobutyric; (d) valeric; (e) isovaleric acid medium in different pH and concentratios.....	34

LIST OF APPENDICES

Appendix 1. pH changes and fungal biomass yields in glucose medium with different pH value.....	49
Appendix 2. Fungal morphology, pH changes, fungal biomass yields in different carbon sources and yeast extract addition.	50
Appendix 3. pH changes and fungal biomass yields in acetic acid medium	53
Appendix 4. pH changes and fungal dried biomass in 1 g/L other VFAs medium (propionic, butyric, isobutyric, valeric, isovaleric acid).....	55
Appendix 5. pH changes and fungal dried biomass in 2.5 g/L other VFAs medium (propionic, butyric, isobutyric, valeric, isovaleric acid).....	58
Appendix 6. pH changes and fungal dried biomass in 5 g/L other VFAs medium (propionic, butyric, isobutyric, valeric, isovaleric acid).....	60
Appendix 7. Fungal dried biomass in volatile fatty acids medium	62
Appendix 8. Yields of fungal biomass in other VFAs.....	63
Appendix 9. <i>Rhizopus microscopus</i> var. <i>oligosporus</i> at magnification 100x.....	65
