**Abstrak**

Pengelolaan Hutan Pangkuan Desa Bodeh belum memberikan dampak positif kepada masyarakat desa hutan secara optimal. Hal ini ditunjukkan dengan banyak masalah sosial seperti okupasi lahan, pencurian kayu dan lainnya.. Tujuan penelitian ini, untuk mengetahui kondisi sosial ekonomi masyarakat Desa Bodeh, pengelolaan HPD Bodeh dan problematikanya, dan strategi pemberdayaan masyarakat desa hutan dalam pengelolaan HPD Bodeh di KHDTK UGM.

Metode yang digunakan dalam penelitian ini adalah studi kasus. Pengumpulan data dilakukan dengan cara observasi lapangan, wawancara dan studi dokumentasi. Penentuan informan dilakukan dengan metode *purposive sampling*. Analisis data yang digunakan adalah pendekatan analisis SWOT (*Strength, Weakness, Opportunity, Threat*).

Hasil penelitian ini menunjukkan bahwa masyarakat Desa Bodeh memiliki ketergantungan tinggi terhadap sumberdaya hutan ditunjukkan mayoritas pekerjaannya adalah petani hutan. Terdapat permasalahan dalam pengelolaan hutan di HPD Bodeh yaitu: 1) kualitas sumberdaya manusia yang rendah; 2) LMDH yang kurang efektif; 3) pengelolaan hutan kurang sesuai secara aspek sosial. Hasil analisis data terkait strategi pemberdayaan masyarakat desa hutan di HPD Bodeh yaitu: 1) sistem agroforestry sesuai wilayah dan fungsi pemanfaatannya; 2) pembaruan kontrak kerjasama; 3) peningkatan keamanan hutan secara bersama 4) sistem informasi pengelolaan hutan yang transparan; 5) penyusunan program LMDH untuk pengembangan SDM; 6) penyuluhan dan pelatihan pengolahan SDA; 7) penerapan pengawasan dan evaluasi pengelolaan HPD secara menyeluruh.

Kata kunci : pemberdayaan, masyarakat, KHDTK, pengelolaan hutan

*Abstract*

*Management of the Forest area of Bodeh Village has not had a positive impact on forest village communities in an optimal way. This is demonstrated by many social problems such as land occupation, timber theft and others. The purpose of this study is to determine the socio - economic conditions of the Bodeh Village community, HPD Bodeh management and its problems, and the strategy of empowering forest village communities in the management of HPD Bodeh at KHDTK UGM.*

*The method used in this research is a case study. Data collection is done by field observations, interviews and documentation studies. Determination of the informant is done by purposive sampling method. Analysis of the data used is the SWOT analysis approach (Strength, Weakness, Opportunity, Threat).*

*The results of this study indicate that the people of Bodeh Village have a high dependence on forest resources, showing that the majority of their work is forest farmers. There are problems in forest management in HPD Bodeh, namely: 1) low quality human resources; 2) LMDH which is less effective; 3) forest management is less suitable in social aspects. The results of data analysis related to the strategy of empowering forest village communities in HPD Bodeh, namely: 1) agroforestry systems according to the region and its use functions; 2) renewal of the cooperation contract; 3) joint forest security improvement 4) transparent forest management information system; 5) preparation of the LMDH program for HR development; 6) extension and training of natural resource processing; 7) implementation of supervision and evaluation of HPD management as a whole.*

*Keys word : emporenment, society, KHDTK, forest management*
