Thesis

THE STRUCTURE OF NEUROMAST AND NERVOUS
SYSTEM OF LATERAL LINE ON THE
DEVELOPMENTAL STAGE OF *Anguilla bicolor*
(McClelland, 1844)

Written by:

Ariel Hananya
18/432376/PBI/01534

Has been defended before the Board of Examiners
on January 15, 2020
and was declared eligible

The Board of Examiners

Supervisor / Thesis Examiner I

Signature

Dr. Bambang Retnoaji, M.Sc

Thesis Examiner II

Zuliyati Rohmah, M.Si., Ph.D.

Thesis Examiner III

Dr. biol. hom. Nastiti Wijayanti, M.Si.

This thesis has been accepted as one of the requirements
to get a Master of Science degree

Signature date

24 JAN 2020

Prof. Dr. Budi Setiadi Daryono, M.Agr.Sc.
Dean of Biology Faculty Universitas Gadjah Mada

I, the undersigned below :

Name : Ariel Hananya
NIM : 18/432376/PBI/01534
Year registered : 2018
Study Program : Master of Biology
Faculty : Biology

Stating that in this thesis scientific document there is no part of other people's scientific work that has been submitted to obtain an academic degree in a Higher Education institution, and also there are no works or opinions that have been written or published by other people/institutions, except those written in citation in this document and complete source is mentioned in the references.

Thus I declare that this scientific document is free from plagiarism elements and if the scientific document of this Thesis is later proven to be a plagiarism of the work of other authors and/or intentionally submits works or opinions which are the work of other authors, then the author is willing to receive academic penalty and/or applicable legal penalty.

Praise and thank the Lord Jesus Christ. Thanks to His grace, the author was able to complete a Thesis entitled " **THE STRUCTURE OF NEUROMAST AND NERVOUS SYSTEM OF LATERAL LINE ON THE DEVELOPMENTAL STAGE OF *Anguilla bicolor* (McClelland, 1844)**". This thesis was written as a responsibility and for being media to store the knowledge that the writer obtained during the implementation of the thesis.

The author also wishes to thank:

1. Prof. Dr. Budi Setiadi Daryono, M.Agr.Sc. as dean of the Faculty of Biology at Gadjah Mada University.
2. Dr. Bambang Retnoaji S.Sc., M.Sc. as my supervisor
3. Arif Prayitno S., Sri Pujiyati, and Adiel Kurnia Bakti for the support and affection given at any time to the author.
4. Ribkah Setio Puji Lestari as my life partner who supported me and keeps praying for me.
5. Bagas Lantip P. as a research team partner who has collaborated on various projects.
6. Atika Ayu Kusumaningtyas, Dita Arya, and Siti Zar'ah as "Anak piyik" who help me very much to finish the research.
7. All members of the Aquatic Research Group as a solid and cheerful research group.
8. Endah Puspita, Sulistiawati, Bina Rahayu Setyasih, Ega Delva, M. Andhi Hardianto, M. Nizhar Naufali and Genta Permana as my support system who forced me to keep smiling with their silliness.
9. KMP Fakultas Biologi as a family while studying at the master of biology program.
10. Histology class of 2018 and 2019 students who have helped and provided fun in the lab.
- 11.

The author also thanks the other that the author cannot mention one by one, for any assistance and guidance given to the author.

The author realizes that in the preparation of this thesis there are still many shortcomings and errors. Therefore, the authors expect constructive criticism and suggestions for further evaluation of the author. Hopefully, this paper can be useful and can be used accordingly to open up insights on the histological structure of the lateral lines of fish.
