TABLE OF TABLE	viii
TABLE OF FIGURE	ix
TABLES OF APPENDIX	xi
ABSTRACT	xii
I. INTRODUCTION	1
1. Background	1
2. Purposes of Research	3
3. Benefits of Research	3
II. LITETATURE REVIEW	4
2.1. Literature Review	4
2.1.1 Chili in Special Region of Yogyakarta	4
2.1.2 Anthracnose Disease	5
2.1.3 <i>Colletotrichum</i> spp.	5
2.1.4 Methods Used in Identifying <i>Colletotrichum</i> spp.	11
2.1.5 Genes Used in Analysis of <i>Colletotrichum</i> spp. Isolated from Chilies Found in Special Region of Yogyakarta	13
2.1.6 Pathogenicity of <i>Colletotrichum</i> spp.	16
2.2 Hypothesis	16
III. METHODOLOGY OF RESEARCH	17
3.1. Morphological Characterization	17
3.1.1. Fungal Isolates	17
3.1.2. Morphological Identification	17
3.2. Phylogenetic Analysis of <i>Colletotrichum</i> spp.	19
3.2.1. Genomic DNA Extraction	19

3.2.2. Amplification of DNA template	19
3.2.3. Sequencing and Analysis of PCR Product	20
3.3. Pathogenicity Assay of <i>Colletotrichum</i> spp.	21
IV. RESULT AND DISCUSSION	22
4.1. General Condition of Study Area	22
4.2. Isolates of <i>Colletotrichum</i> spp.	25
4.3. Morphological Characteristic of <i>Colletotrichum</i> Isolates.	27
4.4. Molecular Identification using Multi-genetic Analysis	39
4.5. Pathogenicity of <i>Colletotrichum</i> Isolates on Chili	53
V. CONCLUSION AND SUGGESTION	56
5.1. Conclusion	56
4.5. Suggestion	56
