

TABLE OF CONTENTS

TITLE PAGE.....	i
VALIDATION PAGE.....	ii
DECLARATION PAGE.....	iii
PREFACE.....	iv
TABLE OF CONTENTS.....	vi
LIST OF TABLES.....	viii
LIST OF FIGURES.....	ix
LIST OF APPENDICES.....	x
INTISARI.....	xi
ABSTRACT.....	xii
CHAPTER I INTRODUCTION.....	1
1.1. Research Background.....	1
1.2. Problems Formulation.....	4
1.3. Research Objectives.....	5
1.4. Research Benefits.....	5
CHAPTER II LITERATURE REVIEW.....	7
2.1. Angiotensin-I Converting Enzyme	7
2.2. Pigeon Pea (<i>Cajanus cajan</i> (L.)).....	10
2.3. Bioactive Peptide.....	13
2.4. Hydrolysis by Pepsin-Pancreatin.....	14
2.5. Peptide Absorption Study.....	16
2.6. Ultrasonic-Assisted Extraction.....	19
2.7. Theoretical Background.....	19
2.8. Hypothesis.....	20
CHAPTER III MATERIAL AND METHODS.....	22
3.1. Materials.....	22
3.2. Equipment.....	22
3.3. Research Location.....	22
3.4. Research Procedure.....	24
3.4.1. Tempe preparation.....	24

3.4.2. Protein tempe Ultrasonic-Assisted Extraction.....	24
3.4.3. Protein hydrolysis.....	25
3.4.4. ACE-inhibitory activity assay.....	26
3.4.5. Dialysis tube fractionation.....	27
3.4.6. Protein concentration.....	28
3.4.7. Peptides absorption study by everted gut sac.....	29
3.5. Experimental Design.....	30
CHAPTER IV RESULTS AND DISCUSSION.....	31
4.1. Ultrasonic-Assisted Protein Extraction of Pigeon Pea and Pigeon Pea Tempe.....	31
4.2. Hydrolysis of Boiled Pigeon Pea and Tempe Protein.....	37
4.3. Angiotensin-I Converting Enzyme (ACE) Inhibitory Activity of the Peptides.....	39
4.4. Peptides Absorption Study by Everted Gut Sac (In Vitro/Ex Vivo). 44	
CHAPTER V CONCLUSIONS AND SUGGESTIONS.....	48
5.1. Conclusions.....	48
5.2. Suggestions.....	49
REFERENCES.....	50
APPENDICES.....	61
