

TABLE OF CONTENT

TITLAE PAGE	i
APPROVAL PAGE	ii
DECLARATION	iii
ACKNOWLEDGEMENT.....	v
TABLE OF CONTENT.....	vi
LIST OF TABLES	viii
LIST OF FIGURES	ix
LIST OF APPENDICES	xi
ABBREVIATIONS.....	xii
ABSTRACT	xiii
INTISARI	xiv
CHAPTER 1 INTRODUCTION.....	1
1.1 Background	1
1.2 Problem Statement	2
1.3 Purpose of Study	2
1.4 Benefits of the Study	2
1.5 Scope and Limitation	2
CHAPTER 2 LITERATURE REVIEW.....	4
2.1 Rainfall and Weather Radar	4
2.2 The Lag Time and Cross-correlation Method	4
2.3 The Fall Velocity and Diameter of Raindrops	4
CHAPTER 3 THEORETICAL BASE.....	6
3.1 Radar Rainfall	6
3.2 Calibration of Radar Rainfall Parameter	6
3.3 The Lag Time	7
3.4 Raindrops Fall Velocity	8
3.5 Estimation of Raindrop Diameter	9
3.6 Statistical Analysis	10
3.7 The IDW Method	11

3.8	The Flood Early Warning System by Radar Data.....	12
3.9	Cloud and Precipitation.....	12
CHAPTER 4 RESEARCH METHODOLOGY		14
4.1	Research Flowchart.....	14
4.2	Study Area.....	16
4.3	Data Acquisition.....	17
4.3.1	Rainfall station	17
4.3.2	Rainfall data	17
4.3.3	Rainfall events	19
4.4	Average Radar Data	20
4.5	Converting Radar Data.....	22
4.6	Cross-correlation Method.....	22
4.7	Fall Velocity to Raindrops Diameter	23
4.8	Spatial of Raindrops Fall Velocity	24
CHAPTER 5 THE RESULTS AND DISCUSSIONS.....		26
5.1	The Cross-correlation Function to Lag Time	26
5.2	Transformation of Radar Rainfall	29
5.3	The ARR Data and Average Radar Rainfall	33
5.4	The Estimation of Fall Velocity and Diameter of Raindrop	37
5.5	The Overall Results.....	39
5.5.1	Correlation pair of results	41
5.6	The Spatial of Lag Time and Fall Velocity of Radar Raindrop	44
5.7	The Relation of Results with Flash Flood Early Warning System	50
5.7.1	The Concept of the early warning system	53
5.8	The Challenge of Radar Rainfall Data	54
CHAPTER 6 CONCLUSION AND RECOMMENDATION		56
6.1	Conclusion.....	56
6.2	Recommendation.....	56
REFERENCES.....		57
APPENDICES.....		60
