Retrieved October 30, 2019, from Ken research: size has increased with the boost in air freight and sea freight, the development of transportation infrastructure and increase in number of freight forwarders, increasing industrial activities, growing FMCG market and rising e-commerce industry. Road freight has the highest share owing to the high number of deliveries that take place through road network. Air freight had the second largest share in the country freight forwarding market. Asian Countries flow corridor is the largest contributor in terms of revenue in the freight forwarding market owing to free trade agreement. The leading players in the industry are DHL, CEVA Logistics, Yusen Logistics, Agility Logistics and others. The freight forwarding market is forecasted to dominate the Indonesia logistics market in future
