Abstract	v
Abstrak	vi
Acknowledgement	vii
Contents	iv
List of Tables	vi
List of Figures	vii
List of Appendices	ix
CHAPTER 1 Introduction.....	1
1.1 Background	1
1.2 Objectives	2
CHAPTER 2 Review of Literature	3
2.1 Surimi.....	3
2.1.1 Surimi Gelation.....	3
2.2 Transglutaminase	4
2.2.1 Microbial Transglutaminase	4
2.3 Coconut husk and its extract	6
2.4 Hypothesis.....	9
CHAPTER 3 Materials and Methods	10
3.1 Materials	10
3.1.1 Chemicals	10
3.1.2 Coconut husk and surimi	10
3.2 Methods.....	10
3.2.1 Preparation of ethanolic extract of coconut extract (ECHE).....	10
3.2.2 Preparation of surimi gel added with MTGase or ECHE.....	11
3.2.3 Analysis	11
3.2.4 Statistical Analysis	15
CHAPTER 4 Results and Discussion	16
4.1 Effect of MTGase at different levels on gel properties of spotted golden goatfish surimi.	16
4.1.1 Breaking Force and Deformation	16
4.1.2 Whiteness and Expressible Moisture Content	17
4.1.3 Protein Patterns.....	18
4.2 Effect of ECHE at different levels on gel properties spotted golden goatfish surimi in combination with selected level of MTGase.	20

4.2.1 Effect of ECHE at different levels on gel properties goatfish surimi.....	20
4.2.2 Effect of ECHE at different concentrations in combination with MTGase (1 unit/g paste) on gel properties goatfish surimi.....	24
4.3 Gel characteristics of selected conditions surimi gel	29
4.3.1 Texture properties	29
4.3.2 Dynamic Rheology	30
4.3.3 <i>In-vitro</i> digestion of selected conditions surimi gel	31
4.3.4 Likeness Score.....	35
CHAPTER 5 Conclusion and Suggestion.....	36
5.1 Conclusion	36
5.2 Suggestion.....	36
REFERENCES	37
APPENDICES	45

List of Tables

Table 1 Expressible moisture content and whiteness of spotted goatfish surimi gel added with and without MTGase at different concentrations.	18
Table 2 Expressible moisture content and whiteness of spotted goatfish surimi gel added without and with ECHE at different concentrations.....	22
Table 3 Expressible moisture content and whiteness of spotted golden goatfish surimi gel added with and without ECHE at different concentrations in combination with MTGase.....	27
Table 4 Texture profile analysis of selected spotted golden goatfish surimi gel in combination with control	30
Table 5 Likeness score of spotted golden goatfish surimi gel treated at various conditions...	35

List of Figures

- Figure 1** Illustration of acyl transfer between α -amino acid of lysine residue and γ -amide group of glutamine residue.6
- Figure 2** Illustration of cross-link between proteins induced by phenolic compound.....8
- Figure 3** Breaking force (A) and deformation (B) of spotted goatfish surimi gel added with and without MTGase at different concentrations. Bars represent standard deviation (n=3). Different lowercase letters on the bars indicate significant differences ($p < 0.05$).... 17
- Figure 4** Protein patterns of spotted goatfish surimi gels added with and without MTGase at different concentrations. SP, surimi paste. Numbers designate the concentrations of MTGase added (unit/ g paste). MHC, myosin heavy chain. 19
- Figure 5** Breaking force (A) and deformation (B) of spotted goatfish surimi gel added with and without ECHE at different concentrations. Bars represent standard deviation (n=3). Different lowercase letters on the bars indicate significant difference ($p < 0.05$).21
- Figure 6** Protein patterns of spotted golden goatfish surimi gels added without and with ECHE at different concentrations. SP, surimi paste. Numbers designate the concentrations of ECHE added (g/100 g paste) MHC, myosin heavy chain.23
- Figure 7** Breaking force (A) and deformation (B) of spotted golden goatfish surimi gel added with and without ECHE at different concentrations in combination with MTGase. Bars represent standard deviation (n=3). Different lowercase letters on the bars indicate significant differences ($p < 0.05$). Control, without any treatment.25
- Figure 8** Illustration of cross-linking process induced by MTGase and phenolics compound into protein.26
- Figure 9** Protein patterns of spotted golden goatfish surimi gels added without and with ECHE at different concentrations in combination with MTGase (1 unit/ g paste). SP, surimi paste. Numbers designate the concentrations of ECHE added (g/100 g protein). MHC, myosin heavy chains. Control, no addition of MTGase and ECHE.....28
- Figure 10** Elastic modulus (G) during heating conditions from 20-90°C of spotted golden goatfish surimi gel treated at various conditions.....31
- Figure 11** TCA-soluble peptide of spotted golden goatfish surimi gel treated at various conditions after in vitro digestion. Bars represent standard deviation (n=3). Different

lowercase letters on the bars indicate significant differences ($p < 0.05$). SP, surimi
paste.....32

Figure 12 ABTS radical scavenging activity and ferric reduction antioxidant power (FRAP) of
spotted golden goatfish surimi gel treated at various conditions after in vitro digestion.
Bars represent standard deviation ($n=3$). Different lowercase letters on the bars
indicate significant differences ($p < 0.05$). SP, surimi paste34

List of Appendices

Appendix 1 Breaking force and Deformation of spotted golden goatfish surimi gel in addition with MTGase at several concentrations.	45
Appendix 2 Whiteness and Expressible moisture content of spotted golden goatfish surimi gel in addition with MTGase at several concentrations.	45
Appendix 3 ANOVA result for Breaking Force, deformation, whiteness, and expressible moisture content for spotted golden goatfish surimi gel in addition with MTGase at several concentrations.	46
Appendix 4 Post Hoc test result for Breaking Force of spotted golden goatfish surimi gel added with MTGase at various concentrations.	47
Appendix 5 Post Hoc test result for Deformation of spotted golden goatfish surimi gel added with MTGase at various concentrations.	47
Appendix 6 Post Hoc test result for Whiteness of spotted golden goatfish surimi gel added with MTGase at various concentrations.	47
Appendix 7 Post Hoc test result for Expressible Moisture Content of spotted golden goatfish surimi gel added with MTGase at various concentrations.	47
Appendix 8 Breaking force and Deformation of spotted golden goatfish surimi gel in addition with ECHE at several concentrations.	48
Appendix 9 Whiteness and Expressible moisture content of spotted golden goatfish surimi gel in addition with ECHE at several concentrations.	49
Appendix 10 ANOVA result for Breaking Force, deformation, whiteness, and expressible moisture content for spotted golden goatfish surimi gel in addition with ECHE at several concentrations.	50
Appendix 11 Post Hoc test result for Breaking Force of spotted golden goatfish surimi gel added with ECHE at various concentrations.	51
Appendix 12 Post Hoc test result for Deformation of spotted golden goatfish surimi gel added with ECHE at various concentrations.	51
Appendix 13 Post Hoc test result for Whiteness of spotted golden goatfish surimi gel added with ECHE at various concentrations.	51
Appendix 14 Post Hoc test result for Expressible Moisture Content of spotted golden goatfish surimi gel added with ECHE at various concentrations.	52

Appendix 15 Breaking force and Deformation of spotted golden goatfish surimi gel in addition with 1 unit MTGase/ g paste in combination with ECHE at several concentrations.	52
Appendix 16 Whiteness and Expressible moisture content of spotted golden goatfish surimi gel in addition with 1 unit MTGase/ g paste in combination with ECHE at several concentrations.	53
Appendix 17 ANOVA result for Breaking force, deformation, whiteness, and expressible moisture content for spotted golden goatfish surimi gel in addition with 1 unit MTGase in combination with ECHE at several concentrations.	54
Appendix 18 Post Hoc test result for Breaking Force of spotted golden goatfish surimi gel in addition with 1 unit MTGase in combination with ECHE at several concentrations.	54
Appendix 19 Post Hoc test result for Deformation of spotted golden goatfish surimi gel in addition with 1 unit MTGase in combination with ECHE at several concentrations.	55
Appendix 20 Post Hoc test result for Whiteness of spotted golden goatfish surimi gel in addition with 1 unit MTGase in combination with ECHE at several concentrations.	55
Appendix 21 Post Hoc test result for Whiteness of spotted golden goatfish surimi gel in addition with 1 unit MTGase in combination with ECHE at several concentrations.	55
Appendix 22 Texture profile analysis (TPA) from selected conditions of spotted golden goatfish surimi gel.....	56
Appendix 23 ANOVA result for TPA of selected conditions of spotted golden goatfish surimi gel.....	57
Appendix 24 Post Hoc Result for Hardness from selected conditions of spotted golden goatfish surimi gel.....	58
Appendix 25 Post Hoc Result for Springiness from selected conditions of spotted golden goatfish surimi gel.....	58
Appendix 26 Post Hoc Result for Cohesiveness from selected conditions of spotted golden goatfish surimi gel.....	58
Appendix 27 Post Hoc Result for Gumminesss from selected conditions of spotted golden goatfish surimi gel.....	58
Appendix 28 Post Hoc Result for Chewiness from selected conditions of spotted golden goatfish surimi gel.....	59

Appendix 29 ANOVA result for Sensory analysis of selected conditions of spotted golden goatfish surimi gel.....	60
Appendix 30 Post Hoc Result for Color from selected conditions of spotted golden goatfish surimi gel.....	60
Appendix 31 Post Hoc Result for Texture from selected conditions of spotted golden goatfish surimi gel.....	60
Appendix 32 Post Hoc Result for Taste from selected conditions of spotted golden goatfish surimi gel.....	61
Appendix 33 Post Hoc Result for Odor from selected conditions of spotted golden goatfish surimi gel.....	61
Appendix 34 L-Tyrosine Standard for calculating TCA-soluble peptide	61
Appendix 35 TCA-soluble peptide content of spotted golden goatfish surimi gel in addition with selected conditions.	62
Appendix 36 Trolox Standard for FRAP measurements.....	62
Appendix 37 FRAP activity of spotted golden goatfish surimi gel in addition with selected conditions.....	63
Appendix 38 Trolox standard for measuring ABTS.	63
Appendix 39 ABTS activity of spotted golden goatfish surimi gel in addition with selected conditions.....	64
Appendix 40 ANOVA result for TCA, ABTS and FRAP of selected conditions spotted golden goatfish surimi gel.....	64
Appendix 41 Post Hoc Result for TCA-soluble peptide from selected conditions of spotted golden goatfish surimi gel.....	65
Appendix 42 Post Hoc Result for FRAP activity from selected conditions of spotted golden goatfish surimi gel.....	65
Appendix 43 Post Hoc Result for ABTS activity from selected conditions of spotted golden goatfish surimi gel.....	65
