Acknowledgement	v
Abstract	vii
Table of Contents.....	ix
List of Tables.....	xii
List of Figures	xiii
Chapter 1 Introduction	1
1.1. Rationale and significance	1
1.2. Objectives	2
1.3. Scope.....	2
Chapter 2 Literature Review.....	4
2.1. Microalga <i>Scenedesmus</i> sp. high-value products	4
2.1.1. Pigments	6
2.1.2. Proteins	7
2.1.3. Lipids.....	7
2.1.4. Carbohydrates.....	9
2.2. Downstream process of microalgal high-value products.....	9
2.2.1. Cell disruption	9
2.2.2. Pigment extraction.....	10
2.2.3. Protein extraction	11
2.2.4. Lipid extraction	13
2.2.5. Two-step direct transesterification	14
2.2.6. Carbohydrate extraction	15
Chapter 3 Materials and Methods.....	16
3.1. Raw material.....	16

3.2. Instruments	16
3.3. Extraction procedures for recovery of microalgal high-values products.....	17
3.3.1. Pigment extraction from microalgal biomass.....	17
3.3.2. Protein extraction from microalgal biomass	18
3.3.3. Lipid extraction from microalgal biomass	18
3.3.4. Direct transesterification from microalgal biomass	18
3.4. Characterization of original microalgal biomass	20
3.4.1. Characterization of original pigment content.....	20
3.4.2. Characterization of original protein content.....	20
3.4.3. Characterization of original lipid content.....	20
3.4.4. Characterization of original ash content.....	20
3.4.5. Characterization of original carbohydrate content	21
3.5. Characterization of extracted high-value products and residual biomass	21
3.5.1. Determination of total ash content	21
3.5.2. Determination of pigment content.....	21
3.5.3. Determination of protein content	22
3.5.4. Determination of lipid content	22
3.5.5. Determination of carbohydrate content.....	22
3.6. Statistical analysis.....	23
Chapter 4 Results and Discussions	24
4.1. Effects of different extraction procedures on the potential recovery yields of high-value products.....	24
4.1.1. Microalgal pigment potential recovery yield	25
4.1.2. Microalgal protein potential recovery yield	25
4.1.3. Microalgal lipid potential recovery yield	26
4.1.4. Microalgal carbohydrate potential recovery yield.....	27
4.2. Effects of different extraction procedures on the residual biomass after each extraction steps	28

GADJAH MADA

EFFECTS OF DIFFERENT EXTRACTION PROCEDURES FOR RECOVERY OF HIGH-VALUE PRODUCTS FROM MICROALGA

Scenedesmus sp.

BASKORO ADI NUGROHO, Dr. Ir. Muhammad Nur Cahyanto, M. Sc.; Prof. Dr. Benjamas Cheirsilp

Universitas Gadjah Mada, 2020 | Diunduh dari <http://etd.repository.ugm.ac.id/>

4.3. Effects of different extraction procedures on the potential recovery yield of high-value products in residual biomass.....	30
4.4. Comparison of high-value products based on the market value from different extraction procedures.....	33
Chapter 5 Conclusions and Suggestions.....	36
5.1. Conclusions.....	36
5.2. Suggestions	36
References	37
Appendix	48

EFFECTS OF DIFFERENT EXTRACTION PROCEDURES FOR RECOVERY OF HIGH-VALUE PRODUCTS FROM MICROALGA

Scenedesmus sp.

BASKORO ADI NUGROHO, Dr. Ir. Muhammad Nur Cahyanto, M. Sc.; Prof. Dr. Benjamas Cheirsilp

Universitas Gadjah Mada, 2020 | Diunduh dari <http://etd.repository.ugm.ac.id/>

List of Tables

Table 1. Chemical composition of *Chlorophyceae* microalgae (% of dry matter)5

Table 2. Main fatty acids content and the total lipid content in *S. obliquus* SJTU-3 under 50% CO₂ concentrations.....8

Table 3. Value of Different High-Value Products Extracted from Microalgal Biomass33

List of Figures

Figure 1. Micrograph of <i>Scenedesmus obliquus</i>	6
Figure 2. PPLC extraction procedures (left) and PDC extraction procedure (right) sequences...	19
Figure 3. Original biomass high-value products content.....	24
Figure 4. Effects of different extraction procedure on the recovery of high-value products from microalgal biomass.....	24
Figure 5. Effects of different extraction procedure on the residual microalgal biomass after each extraction steps.....	28
Figure 6. Effects of PPLC extraction procedure on the potential recovery yield of high-value products from the residual microalgal biomass after each extraction steps	30
Figure 7. Effects of PDC extraction procedure on the potential recovery yield of high-value products from the residual microalgal biomass after each extraction steps	29
Figure 8. Effect of different extraction procedures on total extraction yield of high-value products	32
Figure 9. Effects of extraction sequence on value of extracted high-value products from 1 kg of dried algal, (a) value of individual high-value products extracted, (b) cumulative value extraction.	34
