

Table of Content

CHAPTER 1	INTRODUCTION	17
1.1	Background Study.....	17
1.2	Problem Formulation	22
1.3	Research Objective	22
1.4	Limitation of Research.....	23
1.5	Scope Research.....	24
1.5.1	Research Area.....	24
1.5.2	Scope of Work.....	26
1.6	Research Benefit.....	26
1.7	Originality of research.....	27
CHAPTER 2	REGIONAL GEOLOGY	30
2.1	Regional Geology	30
2.2	Geology of Batu Hijau deposit	33
2.2.1	Geomorphology	33
2.2.2	Stratigraphy	34
2.2.3	Alteration.....	36

CHAPTER 3	BASIC THEORY	39
3.1	Rock Mass	39
3.1.1	Intact Rock Strength	40
3.1.2	Degree of weathering.....	41
3.1.3	Rock Quality Designation	42
3.1.4	Rock Discontinuity	43
3.2	Rock Mass Classification.....	45
3.2.1	Rock Mass Rating.....	45
3.2.2	Geological Strength Index (GSI).....	46
3.3	Finite Element Method (FEM)	47
3.3.1	Strength Reduction Factor (SRF)	48
3.4	Failure Mechanism of Material	49
3.4.1	Generalised Hoek – Brown criterion	49
3.5	Type of Slope Failure.....	51
3.6	Factor of safety	53
3.7	<i>Phase2</i> (Rockscience).....	54
3.7.1	Anisotropic rock mass model.....	54

3.7.2	Isotropic rock mass model.....	58
3.8	Hypothesis	58
CHAPTER 4	METHODOLOGY	60
4.1	Materials & Equipment.....	60
4.2	Research Method	61
CHAPTER 5	RESULT & DISCUSSION	70
5.1	Slope and geological condition of the research area.....	70
5.1.1	Cross-section model of North-East (section 20).....	74
5.1.2	Cross-section model of South-West (section 200)	75
5.2	Rock Mass Classification	76
5.3	Geotechnical Parameter	78
5.4	Groundwater	80
5.5	Slope stability analysis using FEM.....	86
5.5.1	Apparent Dip of Joint.....	86
5.5.2	Strength Reduction Factor (SRF)	88
5.6	Anisotropic vs Isotropic Rock Mass Model of Failure	92
CHAPTER 6	CONCLUSION & RECOMMENDATION.....	99

6.1	Recommendation	101
