

INTISARI

Penelitian ini bertujuan menganalisis struktur, perilaku, dan kinerja industri bank umum syariah di Indonesia pada periode 2011-2017. Penelitian ini menggunakan data empiris 10 bank umum syariah di Indonesia yang bersumber dari Laporan Tahunan Bank Umum Syariah dan Statistik Perbankan Syariah Indonesia yang dikeluarkan oleh Otoritas Jasa Keuangan. Metode analisis yang digunakan adalah metode kualitatif dan metode kuantitatif dengan model ekonometrika yang berbasis pada kerangka teori *Structure, Conduct, Performance* (SCP). Hasil estimasi regresi panel menunjukkan bahwa struktur pasar (*market share*) bank umum syariah tidak berpengaruh signifikan terhadap profitabilitas (*Return on Asset*) bank umum syariah. Struktur pasar industri bank umum syariah di Indonesia bukan menjadi faktor utama dari kinerja Industri.

Kata Kunci: Struktur-Perilaku-Kinerja, Industri Bank Umum Syariah

ABSTRACT

This study aims to analyze the structure, conduct, and performance of the sharia commercial bank industry in Indonesia in the period 2011-2017. This study uses empirical data on 10 sharia commercial banks in Indonesia sourced from the Annual Report of Sharia Commercial Banks and Indonesian Sharia Banking Statistics issued by the Financial Services Authority (Otoritas Jasa Keuangan). The analytical method used is a qualitative method and a quantitative method with an econometrics model based on the theoretical framework of Structure-Conduct-Performance (SCP). Panel regression estimation results show that the market structure (Market Share) of Islamic commercial banks does not significantly influence the profitability (Return on Assets) of Islamic commercial banks. The market structure of the sharia commercial bank industry in Indonesia shows not a major factor in industry performance.

Keywords: *Structure-Conduct-Performance (SCP), Sharia Commercial Bank Industry.*
