

## INTISARI

Penelitian ini bertujuan untuk mengetahui pengaruh Dana Desa, Alokasi Dana Desa, dan Pendapatan Asli Desa terhadap Kemiskinan 30 kalurahan-kalurahan yang berada di Kabupaten Kulon Progo. Populasi penelitian yang digunakan dalam penelitian ini adalah 87 Kalurahan di Kabupaten Kulon Progo. Metode pengumpulan sampel yang digunakan dalam penelitian ini adalah *Purposive Sampling*. Sampel dalam penelitian ini adalah 30 kalurahan yang melaporkan dan menyerahkan realisasi Anggaran Pendapatan dan Belanja Desa Tahun 2015-2019 ke Dinas Pemberdayaan Masyarakat Desa, Pengendalian Penduduk dan Keluarga Berencana Kabupaten Kulon Progo . Total data observasi yang diolah sejumlah 150 data. Hipotesis dalam penelitian ini diuji menggunakan regresi data panel menggunakan program *Eviews 8*. Hasil dari penelitian ini menunjukkan bahwa terdapat pengaruh dari Dana Desa, Alokasi Dana Desa, dan Pendapatan Asli Desa terhadap kemiskinan 30 kalurahan di Kabupaten Kulon Progo secara simultan. Apabila dilihat secara parsial, Dana Desa berpengaruh secara signifikan dengan arah negatif terhadap kemiskinan 30 kalurahan di Kabupaten Kulon Progo dan Alokasi Dana Desa berpengaruh signifikan dengan arah positif terhadap kemiskinan 30 kalurahan di Kabupaten Kulon Progo. Sedangkan, Pendapatan Asli Desa tidak berpengaruh secara signifikan dengan arah negatif terhadap kemiskinan 30 kalurahan di Kabupaten Kulon Progo.

Kata Kunci: Alokasi Dana Desa, Dana Desa, Kemiskinan, Pendapatan Asli Desa, Regresi Data Panel

## **ABSTRACT**

*This study aimed to identify the effect of Village Funds, Village Fund Allocation, and Village Original Income on the Poverty of 30 sub-districts located in Kulon Progo Regency. The research population used in this study were 87 sub-districts in Kulon Progo Regency. The sample collection method used in this study is the purposive sampling method. The sample in this study were 30 sub-districts that reported and submitted the realization of the 2015-2019 Village Income and Expenditure Budget to the Village Community Empowerment, Population Control and Family Planning Office of Kulon Progo Regency. The total observation data processed was 150 data. The hypothesis in this study was tested using panel data regression using the Eviews 8 program. The results of this study indicate that there is an effect of Village Funds, Village Fund Allocation, and Village Original Income on the poverty of 30 villages in Kulon Progo Regency simultaneously. Partially, the Village Fund had a significant effect in a negative direction on the poverty of 30 villages in Kulon Progo Regency and the Village Fund Allocation had a significant effect in a positive direction on the poverty of 30 villages in Kulon Progo Regency. Meanwhile, Village Original Income had no significant effect in a negative direction on poverty in 30 urban villages in Kulon Progo Regency.*
